Swiss Native

Product proposal

A single platform where visitors to Lucerne discover and request gifts, book fixed-departure tours and read local stories, and where the shop team and referral partners manage orders, bookings, payments and commissions.

Photo: Kapellbrücke and Water Tower, ermell, CC BY-SA 3.0, Wikimedia Commons

From scattered records to one shop

Today the shop tracks partners, orders, payments and commissions by hand. Swiss Native keeps them in one place, for four kinds of guest.

Tracked separately today

Partners
who referred which guest

Orders
what was asked for and collected

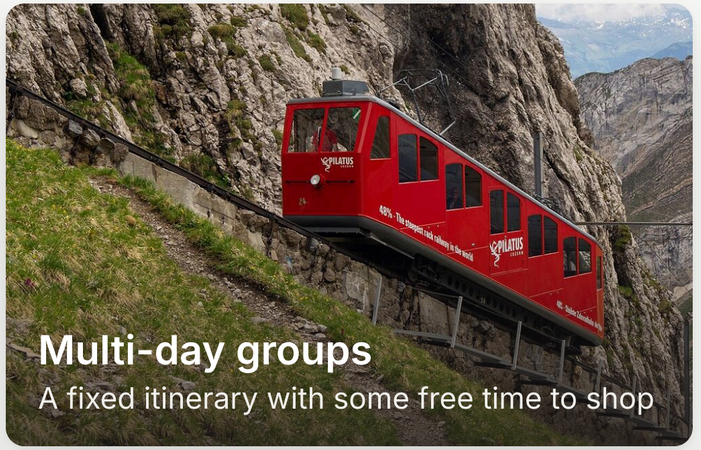
Payments
what is paid and still owed

Commissions
what each partner has earned

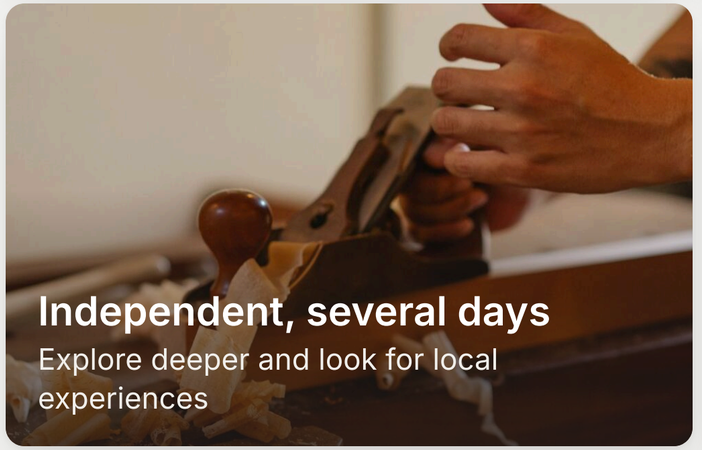
Swiss Native

Four kinds of guest

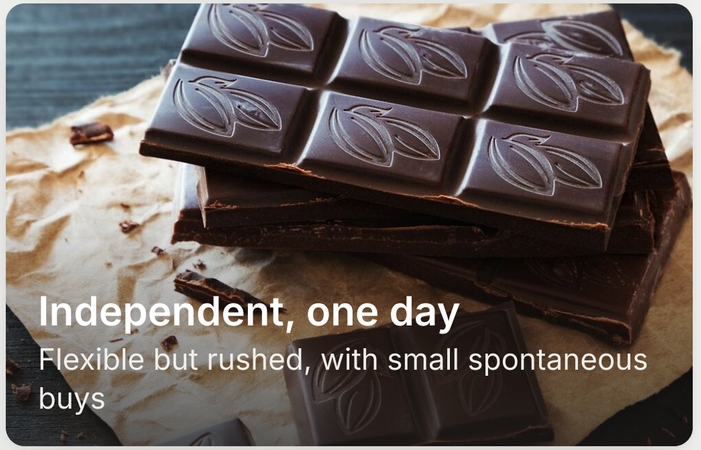
Day-trip groups
Short on time, so they pick and collect fast



Multi-day groups
A fixed itinerary with some free time to shop



Independent, several days
Explore deeper and look for local experiences



Independent, one day
Flexible but rushed, with small spontaneous buys

Gifts and keepsakes
Personalised, requested online, collected at a pickup point.

Fixed-departure tours
Seats, deposits and a 15-minute hold while the guest pays.

Stories
Articles with audio and video that link to gifts and tours.

Trip assistant
A chat that collects trip details and passes them to the team.

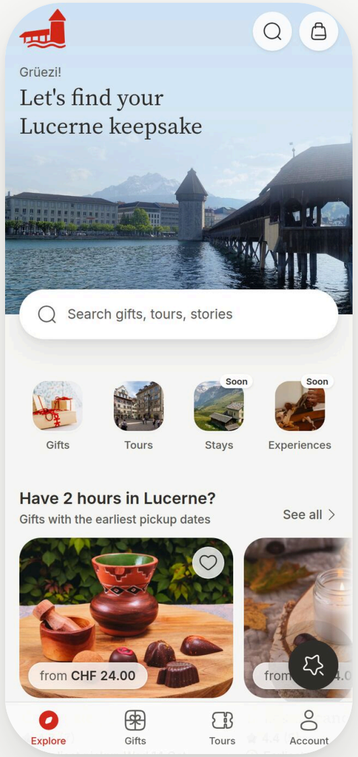
Referral partners
QR codes, tracked sales, commissions and payouts.

Reports
Which channels, guests and products actually earn money.

Three roles, one platform

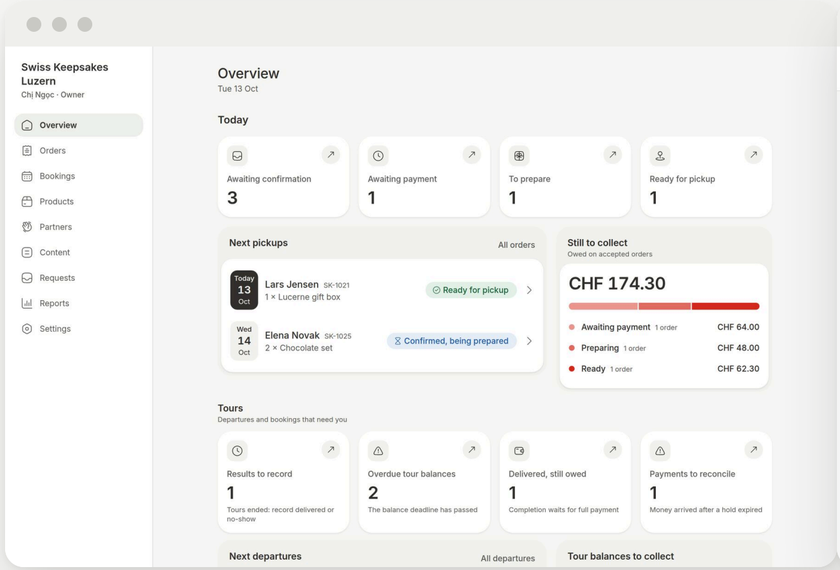
English · German

Each person sees only what they need: guests shop on a phone, the shop team runs the business on a computer, and partners get a limited report.



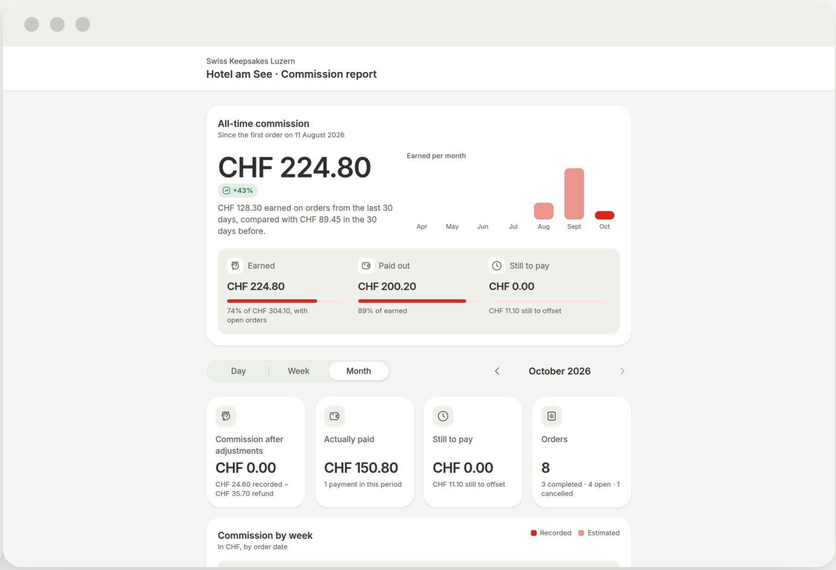
Guest

Browses, requests gifts, books tours, pays and tracks orders on a phone.



Shop team

Owner and Manager handle orders, departures, payments, partners and reports.



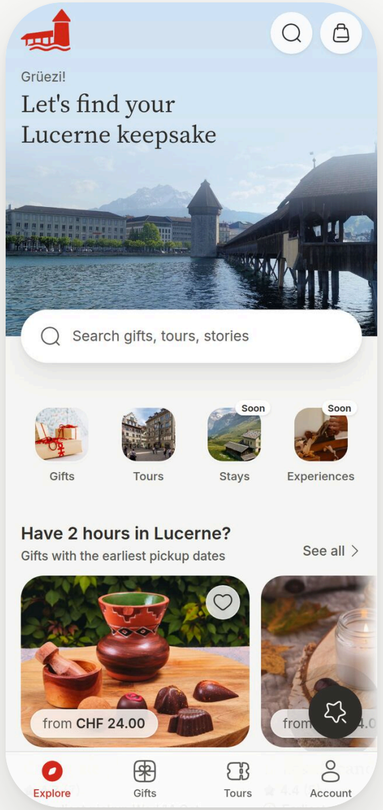
Referral partner

Sees only their own sales and commission, never guest contact details.

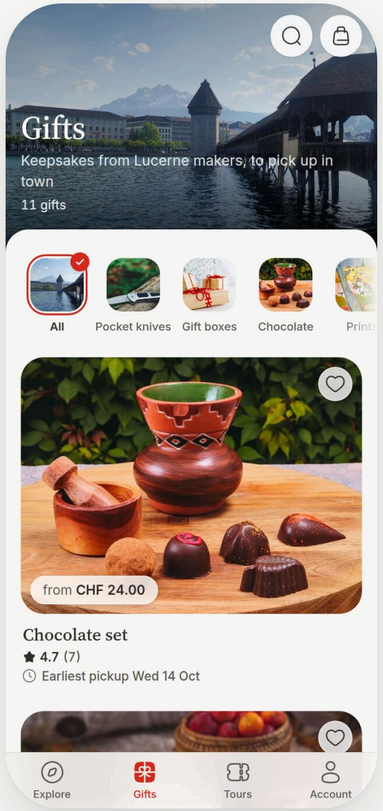
Discover gifts and tours on a phone

Guests browse without an account: the home page suggests gifts and tours by how much time they have, and search finds any item.

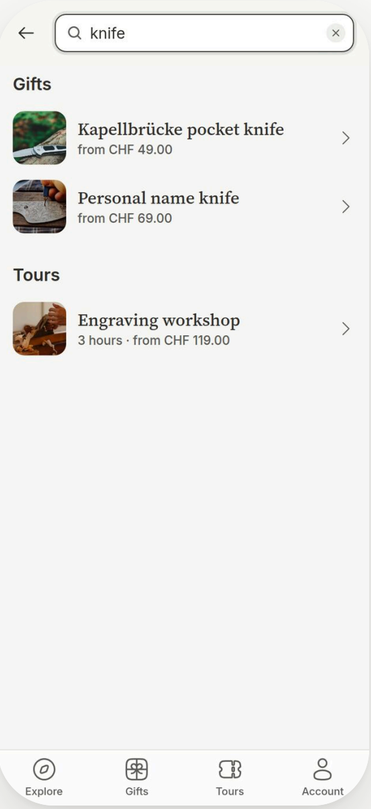
- **Ideas by available time**
  Blocks such as 'Have 2 hours in Lucerne?' and 'A few days here?' lead into gifts, tours and stories.
- **Earliest pickup on cards**
  Each gift card shows its price and the earliest date it can be picked up, so guests can plan early.
- **Browse or search**
  Search finds gifts and tours together; with an empty box, category tiles such as Pocket knives open that range.



Home
Time-based ideas, tours, stories and gift rails



Gifts
Filter by category; earliest pickup on each card

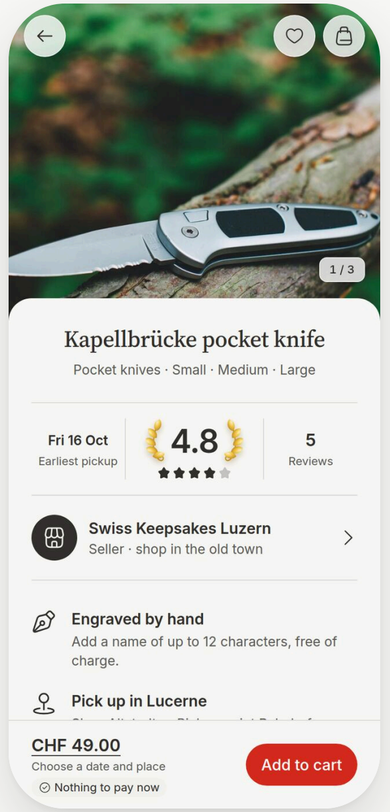


Search
Gifts and tours in one list

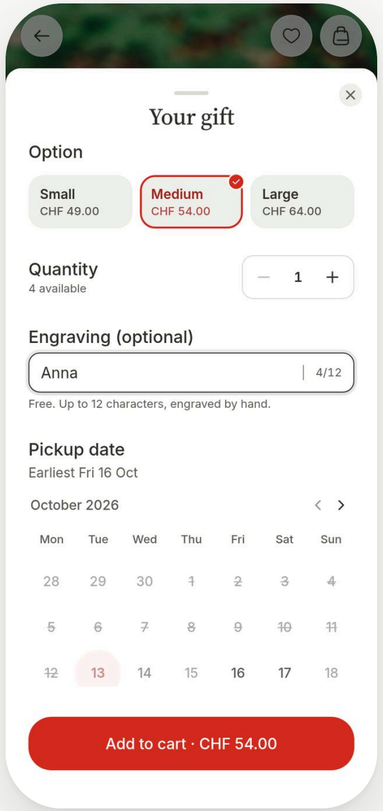
Choose a gift and make it personal

The gift page tells the story, then a choices sheet collects what the shop needs: size, quantity, engraving, pickup date and pickup place.

- **Size, quantity, engraving**
  On the knife, guests pick Small, Medium or Large and may add free engraving of up to 12 characters.
- **Pickup dates that make sense**
  Days the shop cannot prepare in time are greyed out with the reason, such as 'Needs 3 working days to engrave'.
- **Reviews from real buyers**
  Only guests who completed an order can review, and each review shows its purchase date.



Gift page
Photos, story, rating and seller

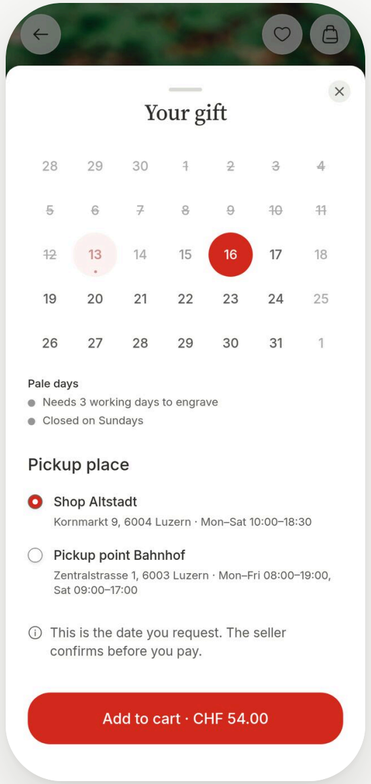


Choices sheet
Size, quantity, engraving and pickup calendar

From pickup choice to a checked cart

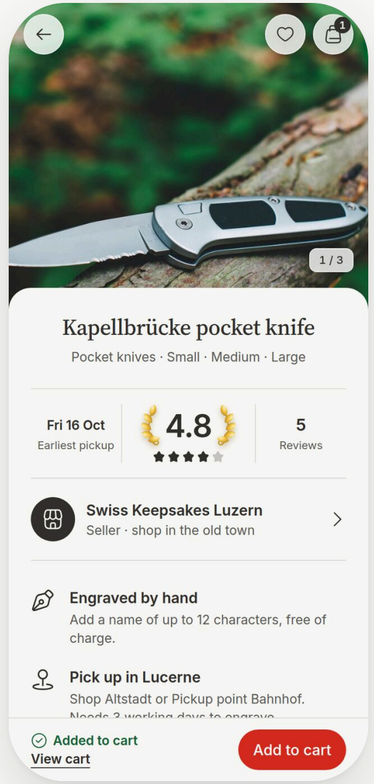
Pickup dates are requests until the shop confirms

Guests set a pickup date and place, get instant feedback when a gift is added, and can check the price or remove items safely in the cart.



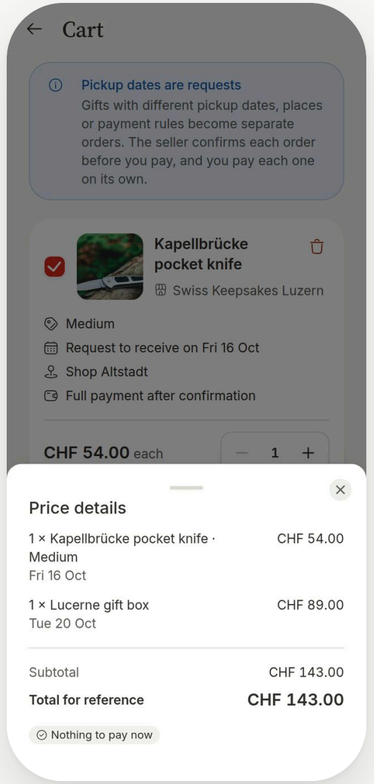
Pick date and place

Pale days show why; Shop Altstadt or Bahnhof pickup point



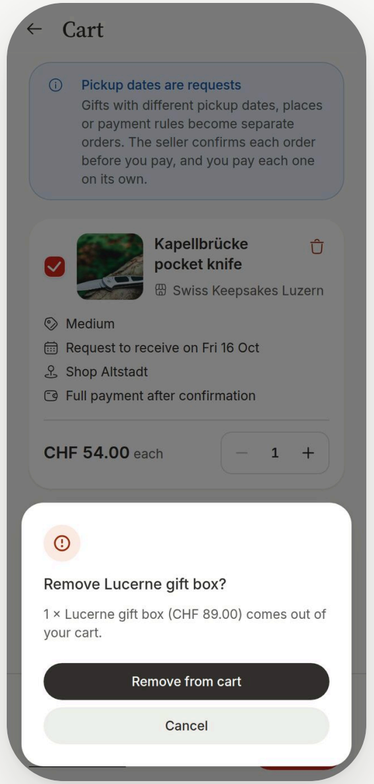
Added to cart

Bottom bar and cart badge confirm the add



Price details

Each item and date; total is only for reference



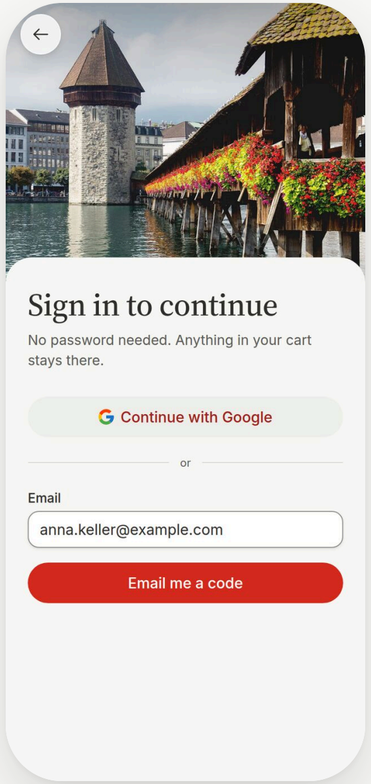
Remove asks first

A dialog names the item and its price

Sign in only when sending a request

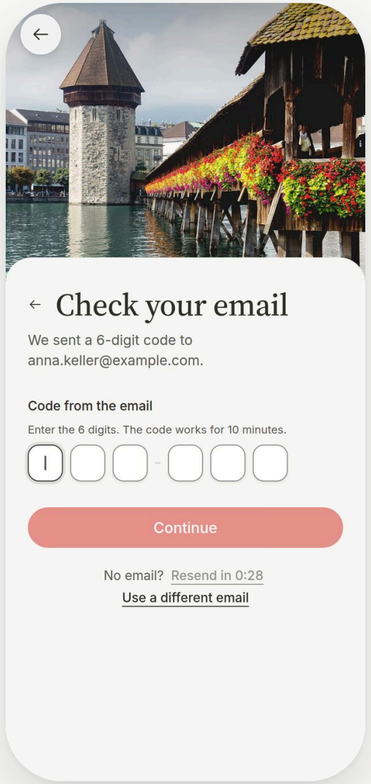
Google and email codes are simulated in this prototype

Guests browse and fill a cart without an account; signing in is asked for only when they press Continue, using Google or a code sent by email.



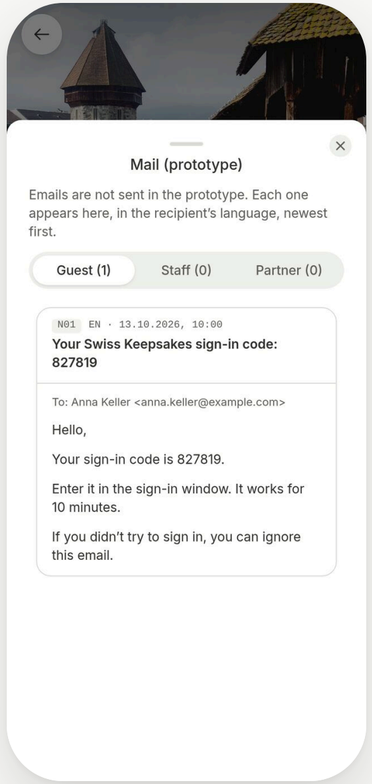
Sign in

No password; the cart stays untouched



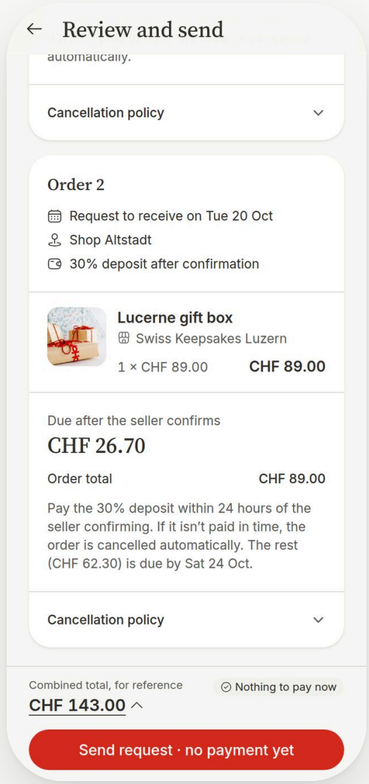
Enter the code

Six digits, valid for 10 minutes, resend after 30 seconds



Code arrives by email

The mock mailbox stands in for real email



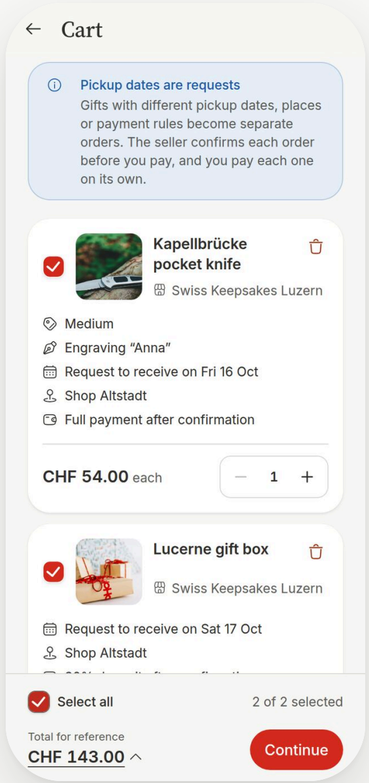
Review each order

Second order: 30% deposit due after confirmation

Request your gifts, pay once accepted

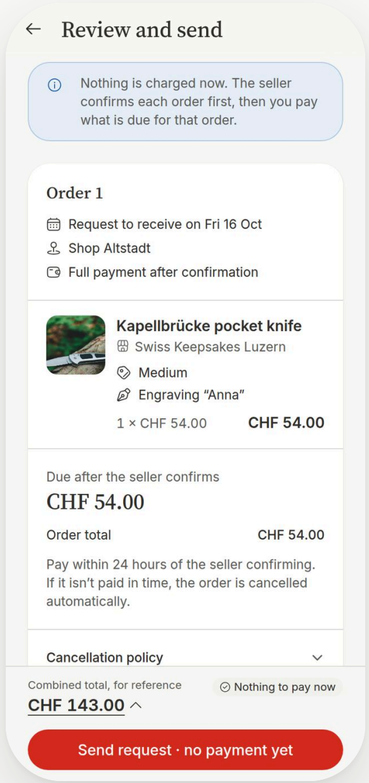
The shop confirms first, then the guest pays within 24 hours

A request is not a purchase: the guest sends the cart, the shop confirms each order, and only then does the guest pay within 24 hours.



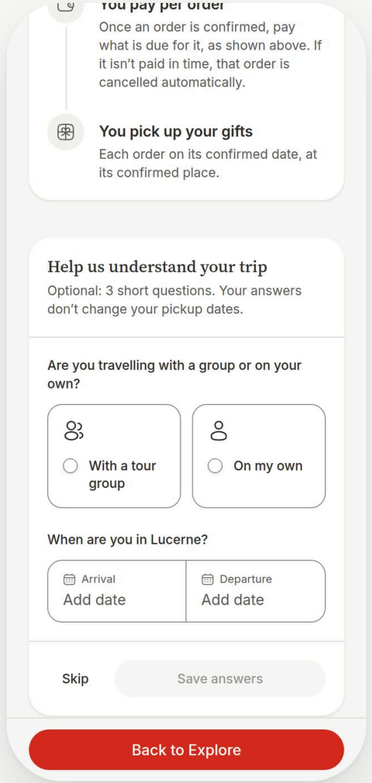
Cart

Tick what to order; different dates become separate orders



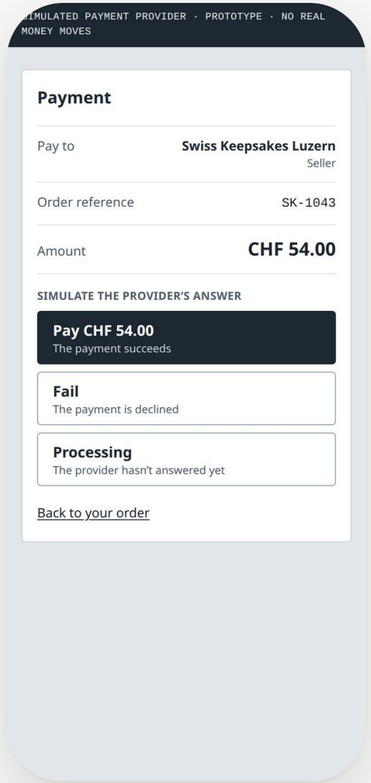
Review

Per order: pickup, amount due after confirmation, policy



Request sent

Orders wait for the shop; nothing is charged



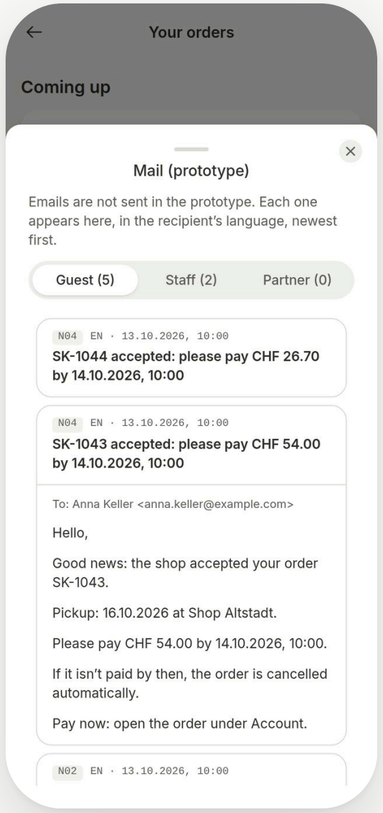
Pay

Payment page opens only after the shop accepts

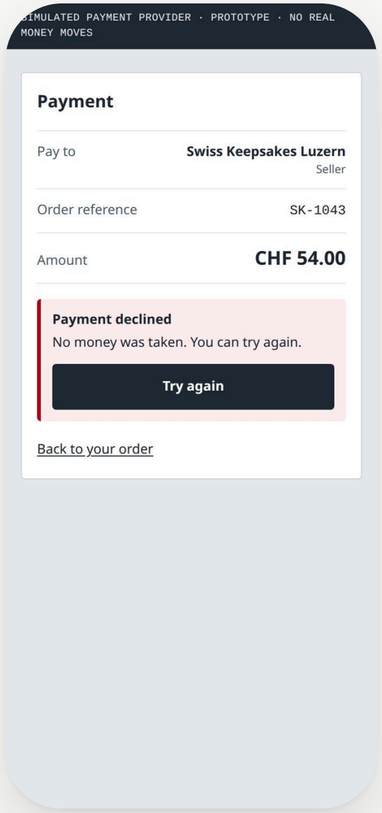
After acceptance: pay, retry or wait

Once the shop accepts, the guest gets an email with the amount and a 24-hour deadline, and the payment page ends in success, a decline or a wait.

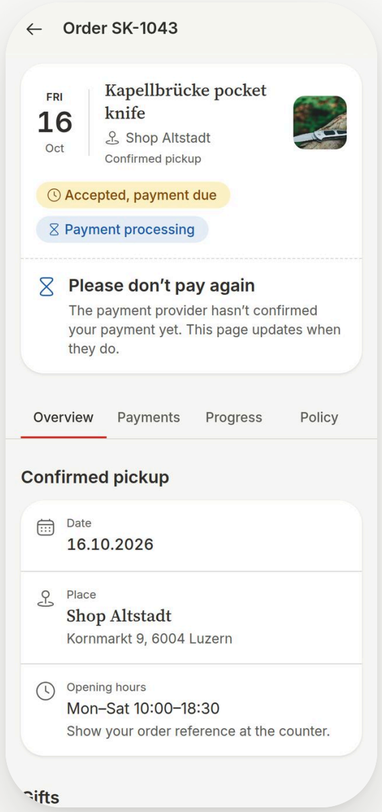
- **Email states the deadline**
  The acceptance email names the amount, the date and time to pay by, and warns about automatic cancellation.
- **A decline loses nothing**
  If the payment is declined, no money is taken and the guest can try again on the same page.
- **No double payments**
  While the provider has not answered, the order shows Payment processing and hides the Pay button.



Acceptance email
Amount, pay-by time and auto-cancel rule



Payment declined
No money taken; Try again reopens payment

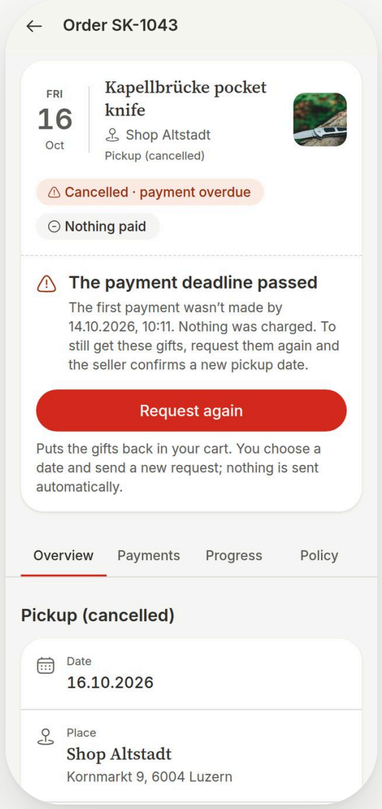


Payment processing
'Please don't pay again' until the provider answers

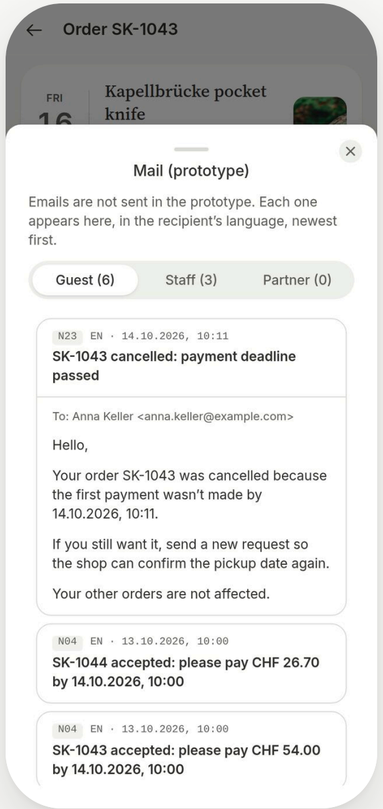
Missed the 24 hours? Request again

If the first payment is late, the order cancels itself after 24 hours, and the guest can put the gifts back in the cart.

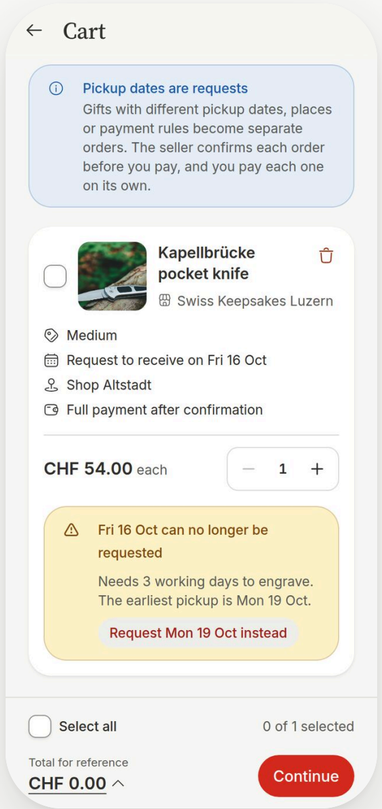
- **Automatic cancellation**
  The order shows Cancelled, payment overdue, nothing is charged, and the stock held for it is released.
- **Request again**
  One tap puts the gifts back in the cart; nothing is sent until the guest picks a date and sends.
- **Dates are re-checked**
  The cart flags a date that no longer works and offers the next valid one, such as Mon 19 Oct.



Cancelled, payment overdue
Nothing was charged



Cancellation email
The guest's other orders are not affected

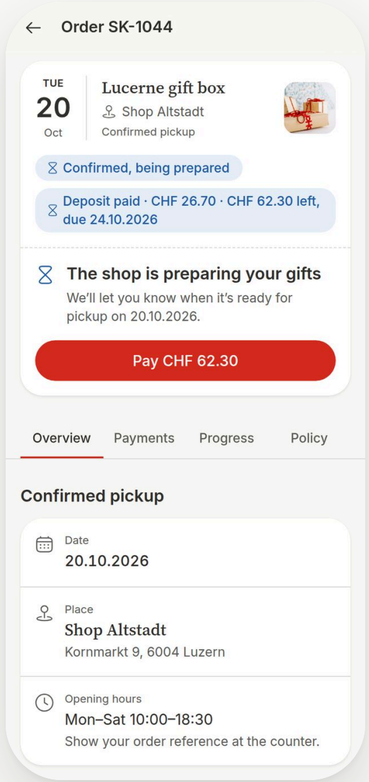


Request again
Gifts return to the cart for a new date

One order, four tabs

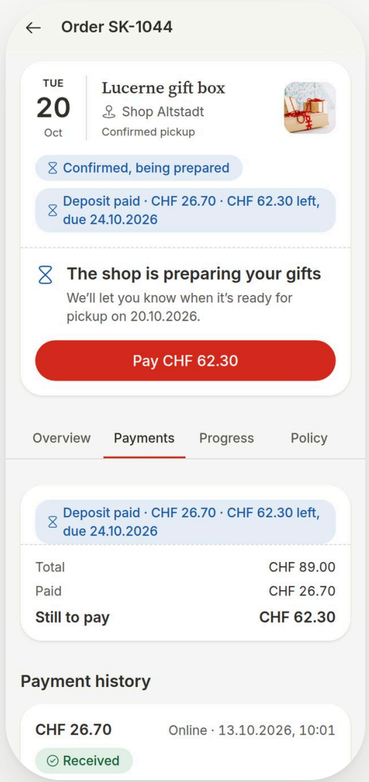
Example: gift box with the 30% deposit paid

Each order page keeps the answers a guest needs: where and when to collect, what is paid, what happened so far, and the agreed terms.



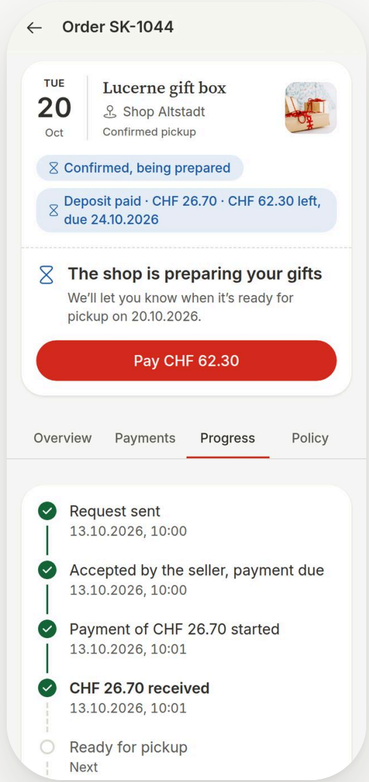
Overview

Pickup date, place and opening hours



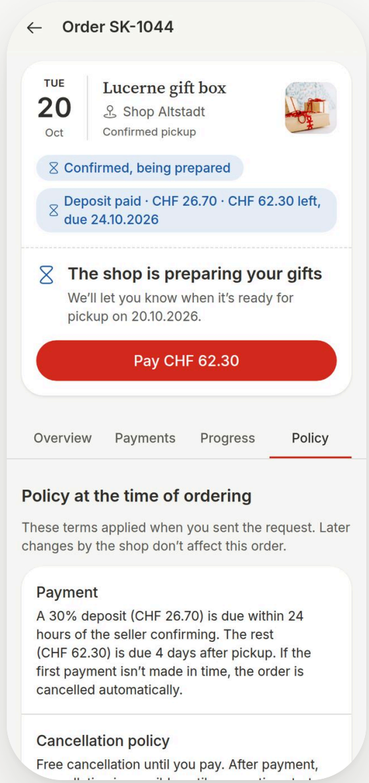
Payments

Total, paid and still to pay



Progress

Request, acceptance, payment, then next steps



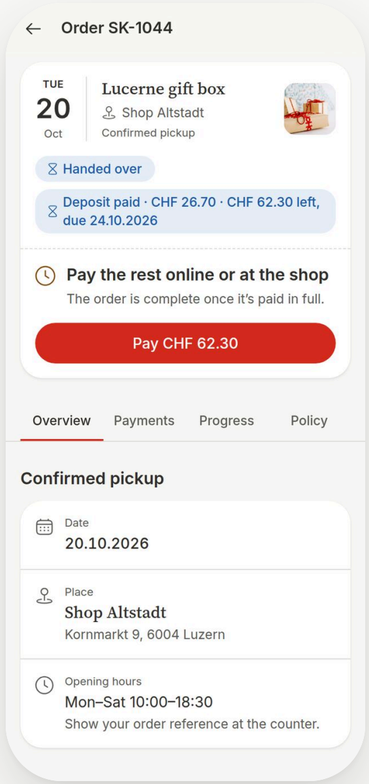
Policy

Terms as at ordering; later changes do not apply

Pay the rest, collect, then review

Reviews open only after the order is completed

After handover a deposit order's balance can still be paid online, and once an order is complete the guest may rate the gift.



Handed over

Pay the rest online or at the shop

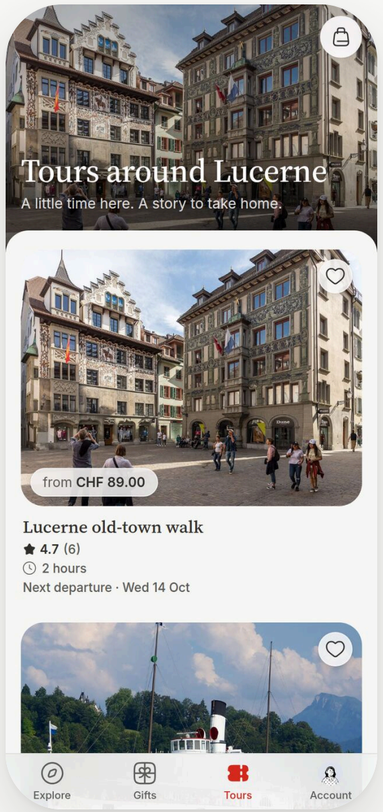
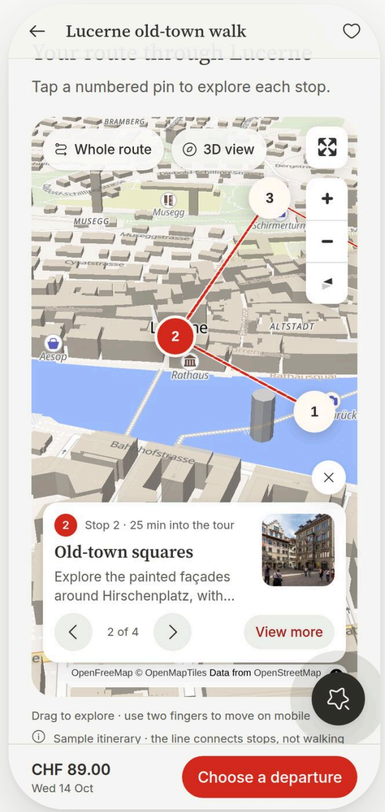
Explore a tour on the map

Guests compare tours, follow the itinerary on a 3D map of Lucerne, and see which departure dates still have seats before they choose one.

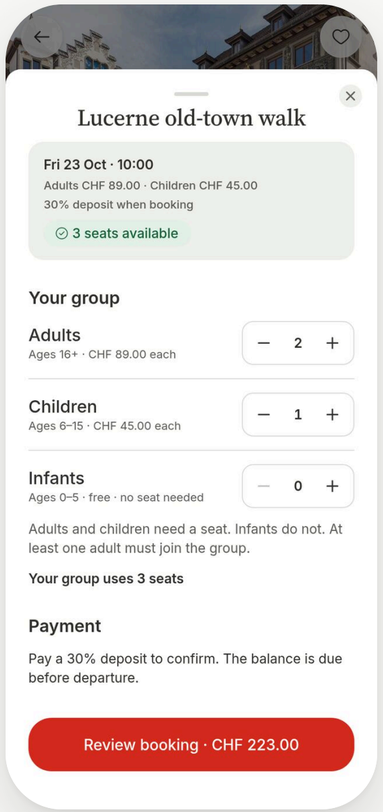
- **3D route map**
  Tapping a numbered stop opens a card with what the guide shows there, so guests see the route before booking.
- **Tours at a glance**
  Each card shows the duration, the lowest price and the next departure date, or says Sold out or Coming soon.
- **Seats left per date**
  Every departure date lists how many seats remain, and a sold-out date is greyed out and cannot be selected.



Tour list



Route and stops

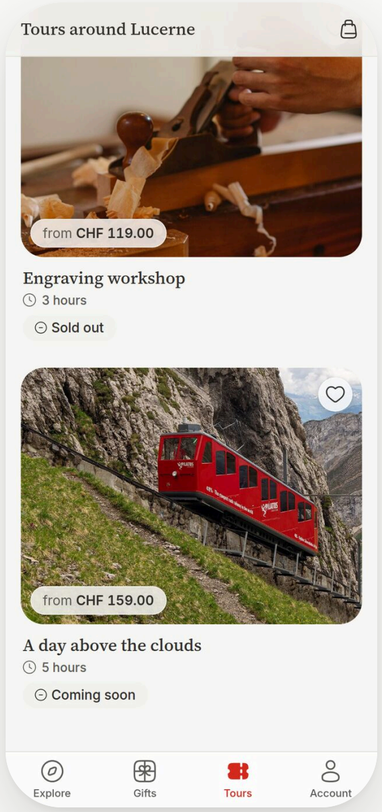


Dates and seats

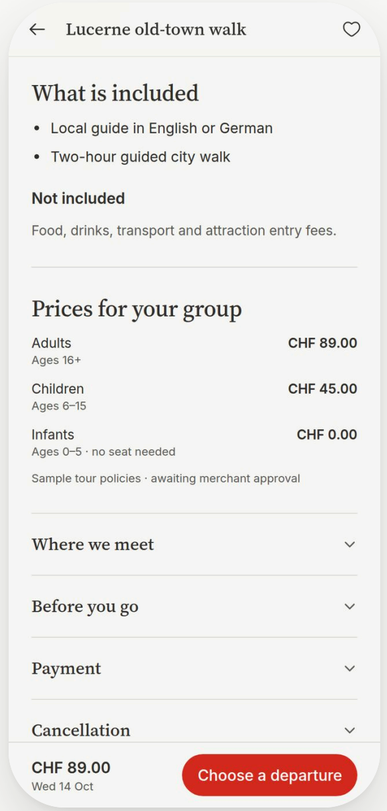
Know what is included before booking

The tour page tells guests what is and is not included, what each age group pays, and the payment and cancellation rules, before they choose a date.

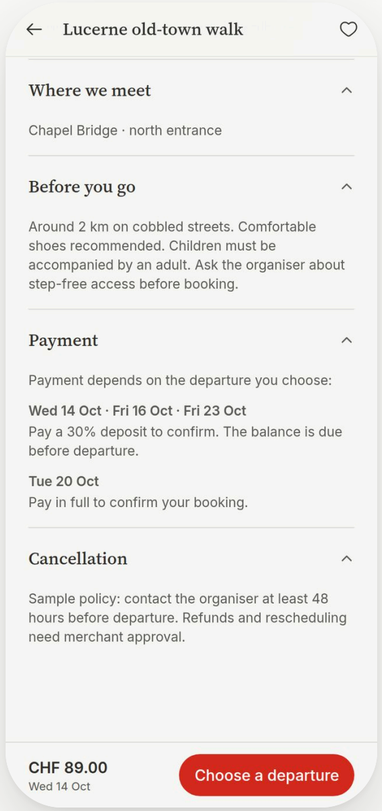
- **Inclusions and exclusions**
  Lists what the price covers, such as a local guide, and what it does not, such as food, drinks and transport.
- **Prices by age group**
  Adults (16+) pay CHF 89, children (6–15) CHF 45, and infants (0–5) are free and take no seat.
- **Policies in plain words**
  Meeting point, participation conditions, payment terms per date and cancellation rules open as short sections below the prices.



Sold out, coming soon
Tours without open seats or dates stay visible but cannot be booked.



Included and prices
Inclusions, exclusions and the price for each age group.

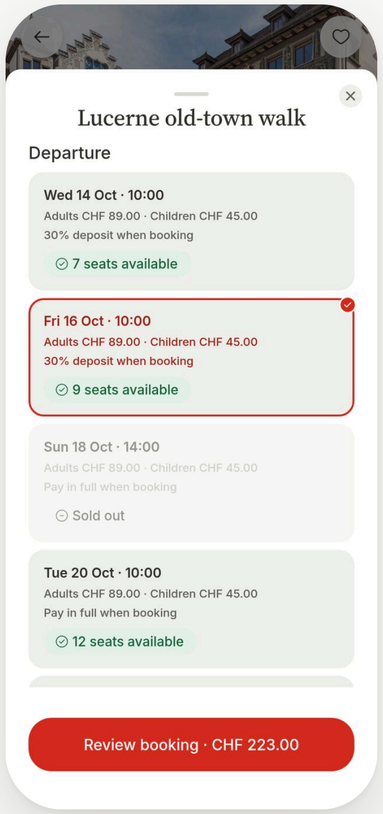


Rules in plain words
Meeting point, conditions, payment terms, cancellation.

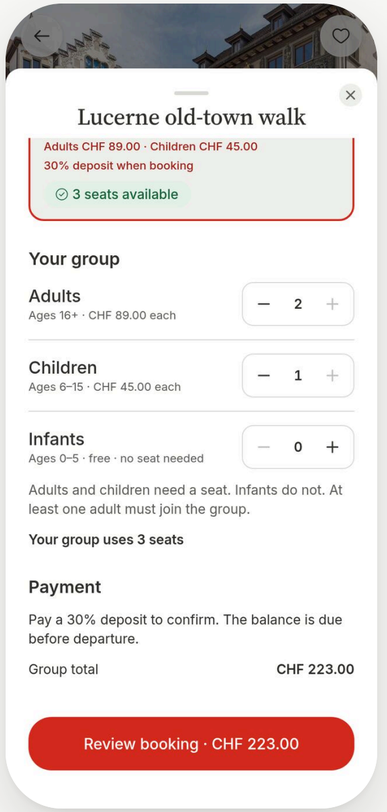
Choose a date and your group

A bottom sheet lists every departure with its seats left and payment rule, then guests set how many adults, children and infants join.

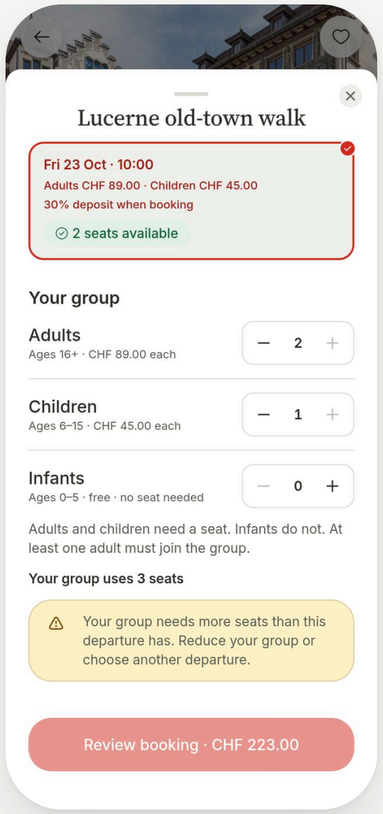
- **Seats left per departure**
  Each date shows its seats left, and fully booked dates show Sold out and cannot be selected.
- **Who needs a seat**
  Adults and children each use one seat, infants use none, and at least one adult must join the group.
- **Checked again at booking**
  Choosing a date reserves nothing; if another guest takes the seats first, the sheet warns that the group no longer fits.



Pick a departure
Seats left and payment rule for each date.



Set the group
Counters stop at the seats left.

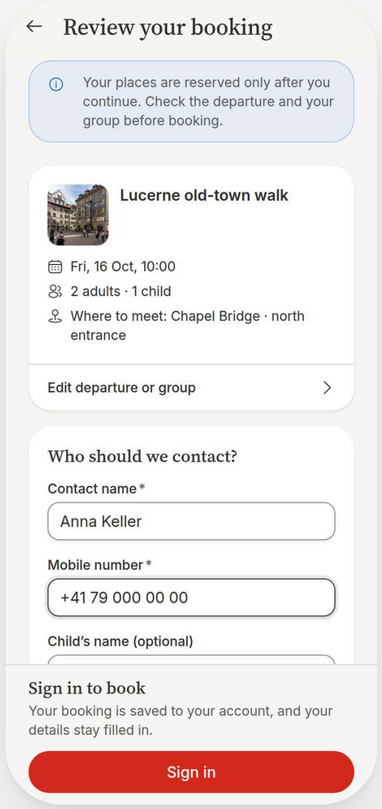


Seats taken meanwhile
Another guest booked first, so the group no longer fits.

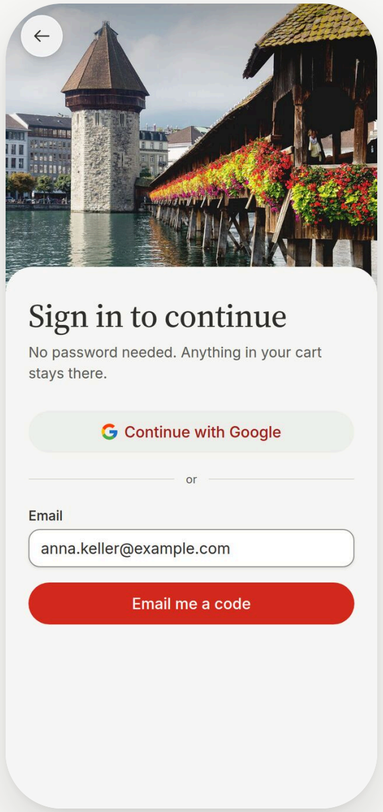
Review the booking, sign in on the way

Guests check the price, their contact details and the amount due today before signing in, and nothing they typed is lost afterwards.

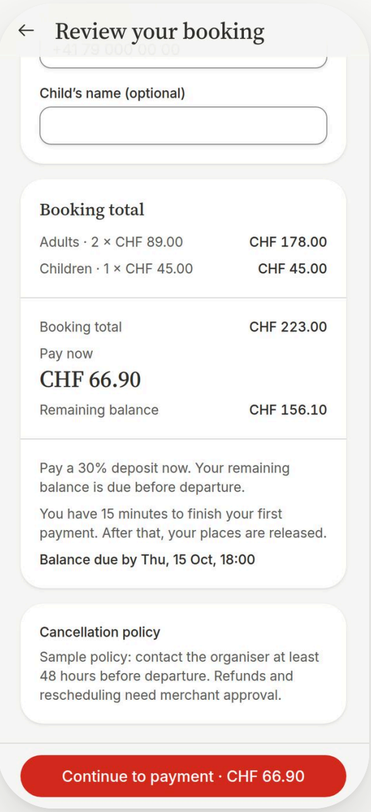
- **Sign in only at the end**
  Guests see the full review first; signing in with Google or an emailed code returns them to the same booking.
- **Amount due today**
  The review separates the booking total, what is paid now (a 30% deposit here, CHF 66.90) and the remaining balance.
- **Deadline and policy up front**
  The balance due date (here Thu 15 Oct, 18:00) and the cancellation policy are shown before any payment.



Review before sign-in
Contact name and mobile are required; a child's name is optional.



Sign in
Google or an emailed code, no password.

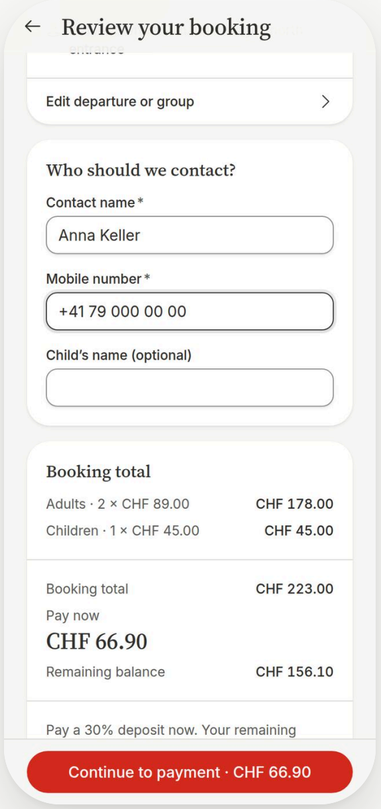


Totals and deadline
Due now, remaining balance and cancellation policy.

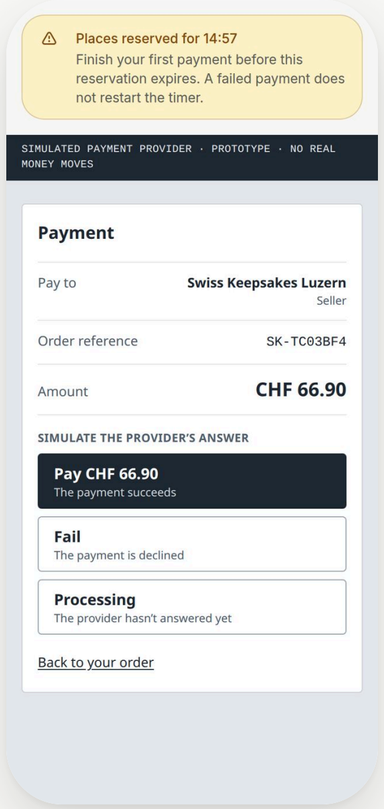
Book a tour, hold seats for 15 minutes

The guest confirms contact details and pays the amount due today, and the seats stay held for 15 minutes while the payment is completed.

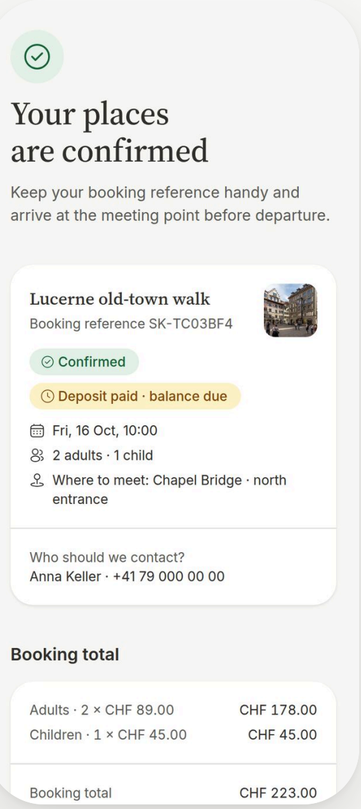
- **15-minute seat hold**
  The clock starts when the guest continues to payment, keeps running after a reload and is not restarted by a failed attempt.
- **Payment rule per departure**
  Each date is set to full payment, a 30% deposit with the balance later, or booking now and paying later.
- **Booked is not paid**
  The confirmation shows booking status and payment status separately, with the amount still owed and its due date.



Review details



Pay within the hold

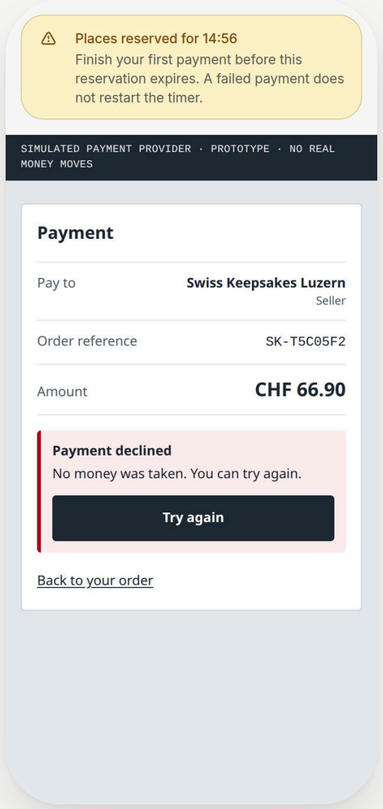


Places confirmed

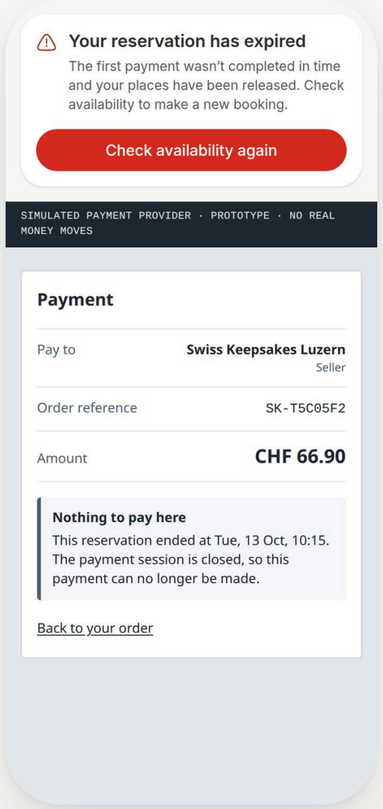
Failed payment and expired holds

A declined payment can be retried until the 15 minutes run out; after that the seats go back on sale and the guest rebooks.

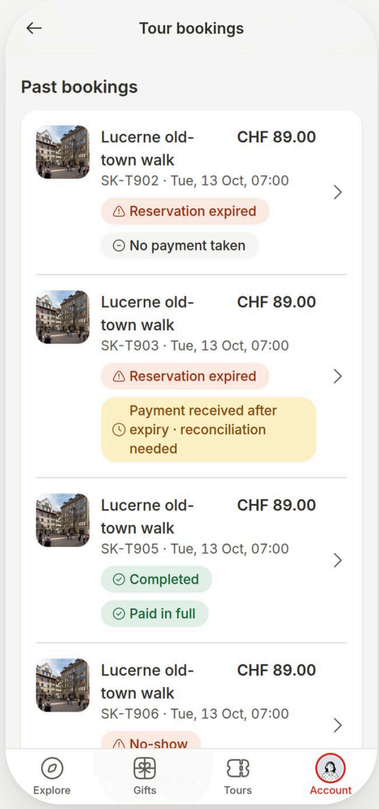
- **Retry in the same window**
  A declined payment takes no money and the guest may try again, but the original deadline keeps running.
- **Expiry releases the seats**
  When the hold ends the booking becomes Expired, its seats are released once, and the payment can no longer be made.
- **Rebook from the same page**
  Check availability again reopens the departure sheet with the group kept, and seats and prices are re-checked.



Payment declined
No money taken; the same countdown keeps running.



Reservation expired
Seats released; a button checks availability again.

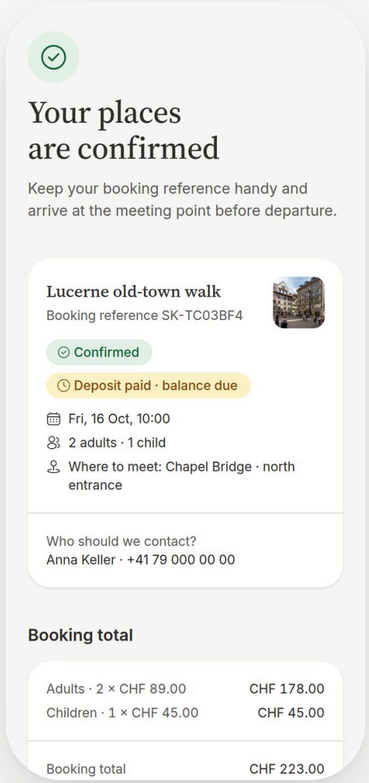


Kept in the account
Expired bookings stay listed as No payment taken.

Confirmation depends on how the guest paid

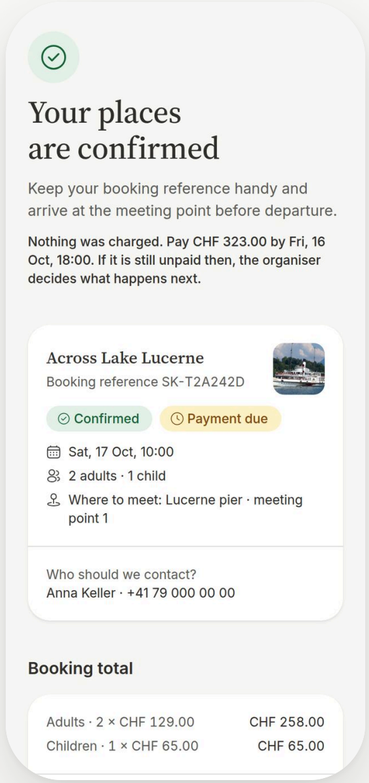
Three ways to pay

Every confirmed booking shows what was paid and what is still due, then offers a calendar file and an optional short trip profile.



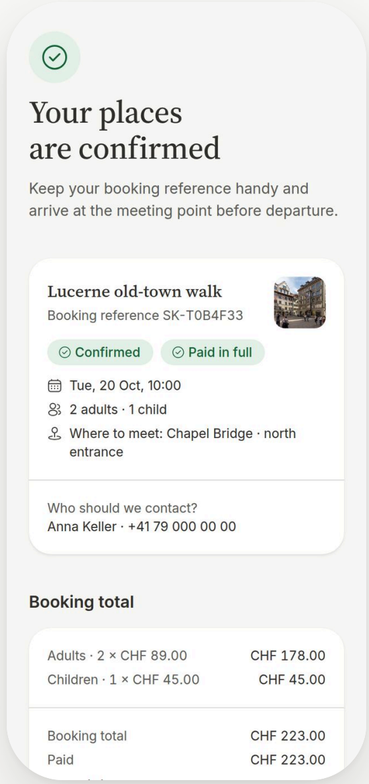
30% deposit

Confirmed; balance due before departure.



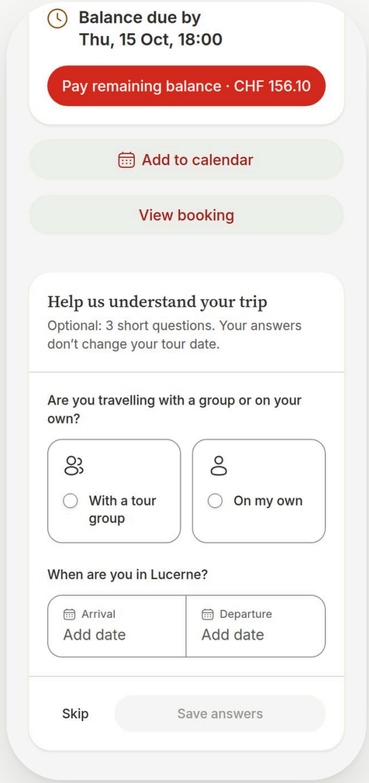
Pay later

Nothing charged; full amount due by the deadline.



Paid in full

No balance, nothing further to pay.



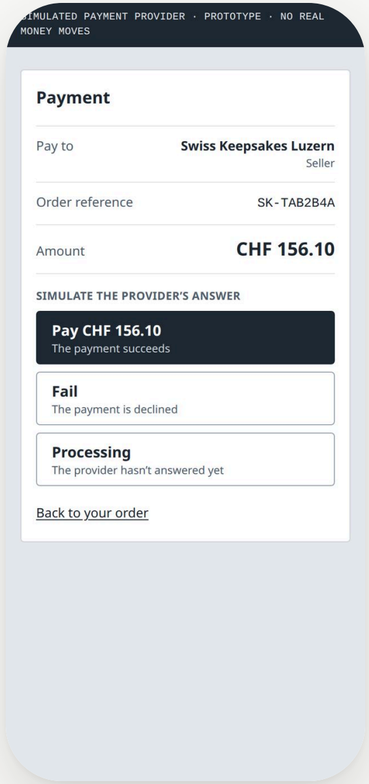
Calendar and trip profile

Add the date; three optional questions.

Pay the balance later, without a new hold

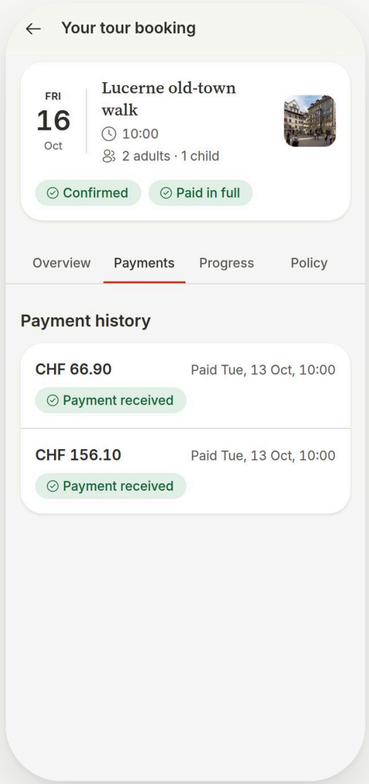
After booking

From the account, a guest opens the booking, pays the remaining balance online, and keeps a record of payments, progress and the agreed terms.



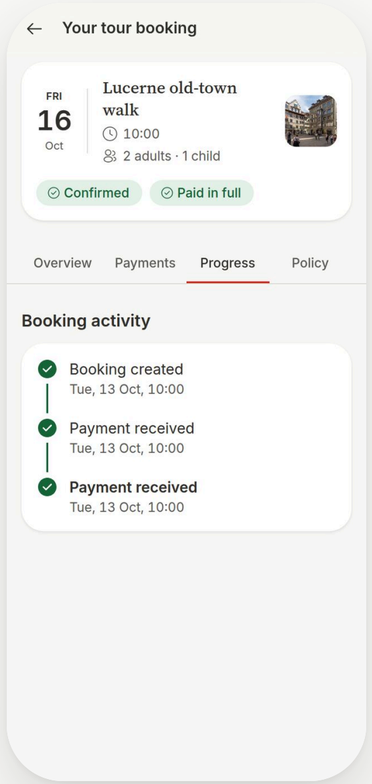
Pay the balance

No countdown: seats are already confirmed.



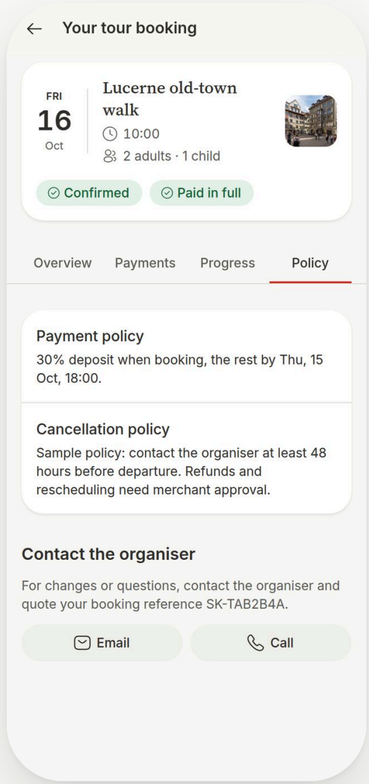
Payments tab

Each payment with its amount and date.



Progress tab

Timeline: booking created, each payment received.



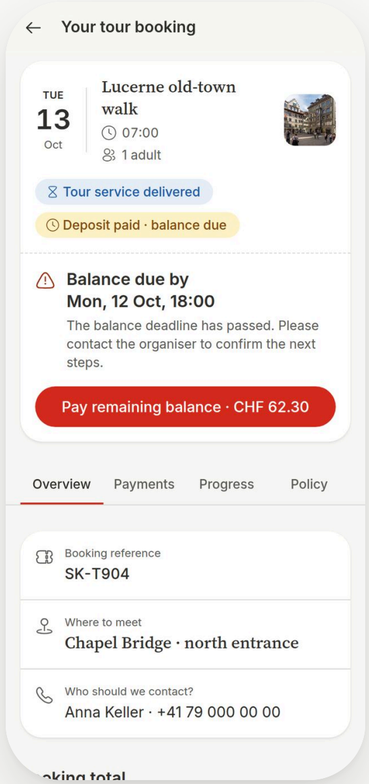
Policy tab

Payment and cancellation terms, organiser contact.

After the tour: delivered, no-show, reviews

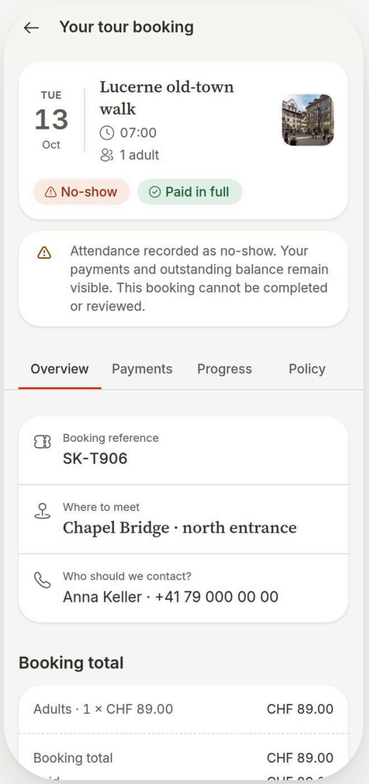
Shop records, guest sees

The shop records what happened on the day, the guest's booking reflects it, and only a completed booking can be reviewed.



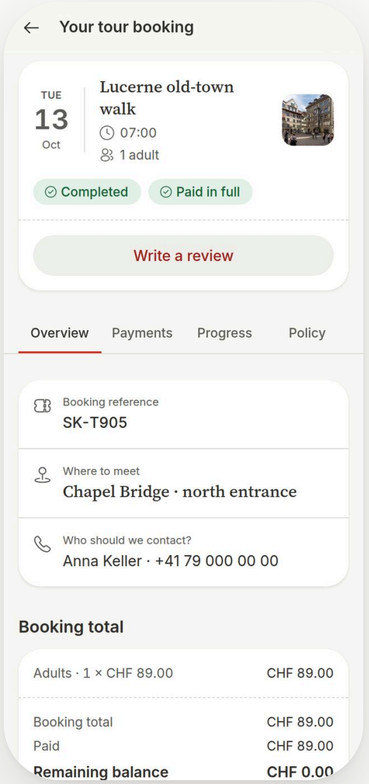
Delivered, balance due

Tour done; the unpaid balance can still be paid.



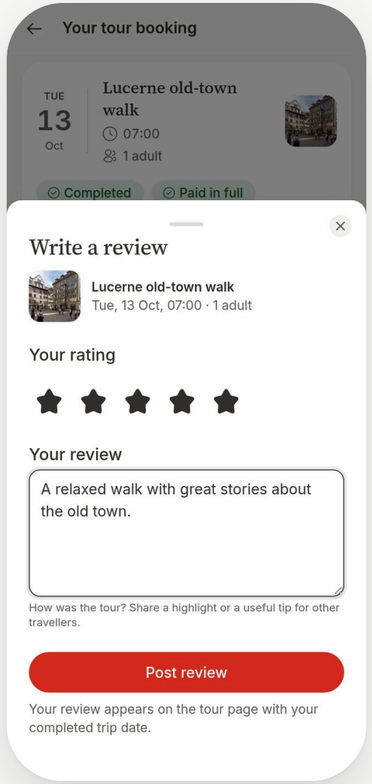
No-show

Payments stay visible; no completion or review.



Completed

Paid in full; Write a review appears.



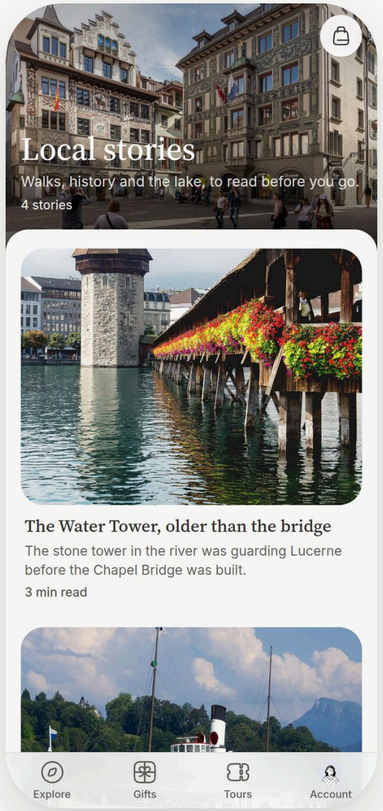
Write a review

Rating and comment, shown on the tour page.

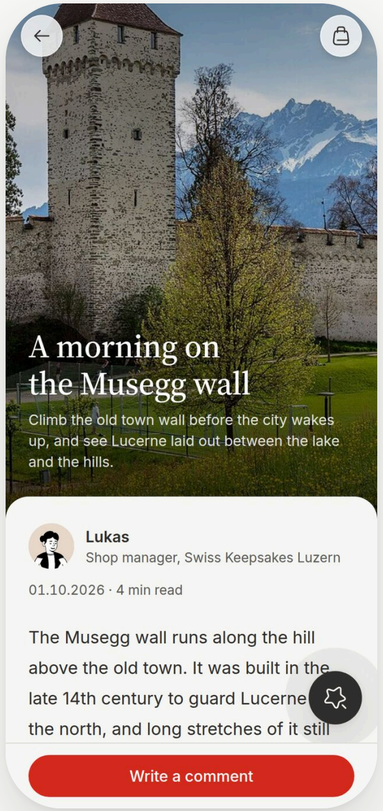
Stories that lead to gifts and tours

Short local stories, written by the shop in English and German, bring guests from reading about Lucerne to buying a gift or booking a tour.

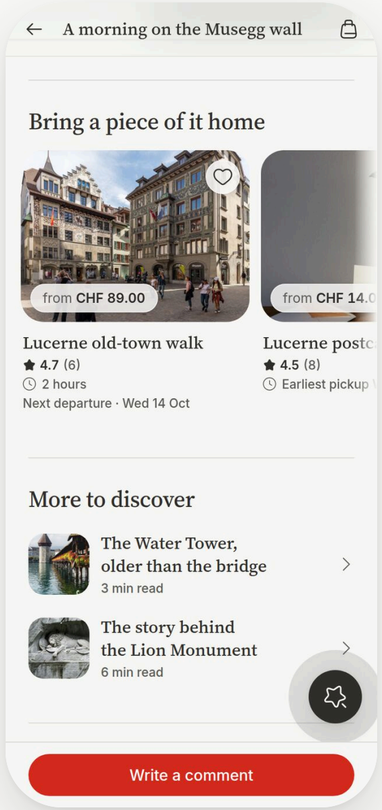
- **Stories in the guest's language**
  The list shows only stories in the chosen language, so a guest never meets a half-translated page.
- **Blog-style article pages**
  A large cover, the author, photos, a video and sound, all written by the shop.
- **Linked gifts and tours**
  Each story ends with the tour and gift the shop chose, in the order the shop set.



Stories list



Article

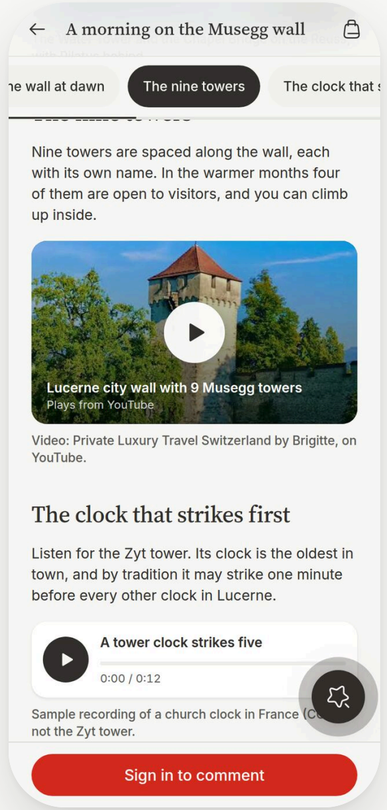


Linked gifts and tours

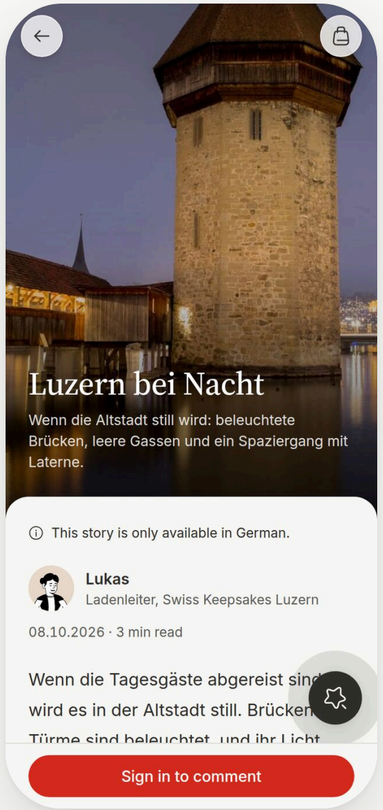
Stories with video, sound and a contents bar

Articles read like a travel blog: a contents bar follows the reader, video loads only when tapped, and a story in the other language is flagged.

- **Contents bar follows you**
  Section chips stay at the top and highlight where the reader is; a tap jumps to that section.
- **Video loads on tap**
  The YouTube video downloads only after a tap, so pages stay fast; audio plays right in the article.
- **Comments need sign-in**
  Guests read comments freely; writing one asks them to sign in and returns them to the same article.



Contents bar, video, audio
Bar highlights the section being read

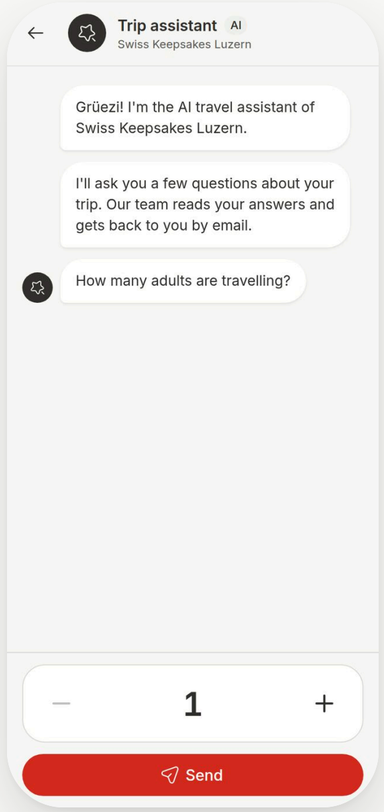


Only in one language
A notice explains the text language

Trip advice from the shop's assistant

A chat asks the guest the questions the shop has set up, then sends the answers to the team, who reply by email.

- **One question at a time**
  Counters, dates and choices appear in the conversation, so a guest answers without typing long text.
- **Answers go to the team**
  The assistant asks only the shop's questions and gives no plan; staff read the answers and reply by email.
- **One tap away**
  A floating button on home, tours and stories opens the chat, no sign-in needed.



Start

Track every order and booking

The Account tab is the guest's home for everything bought: orders, tour bookings, payments due and the history of each status change.

- **Status and payment apart**
  Each order shows two labels, such as 'Accepted' and 'Payment due', so progress and money never get mixed up.
- **Pay the balance later**
  After a deposit, 'Pay CHF 62.30' stays on the order, even after the shop hands the gift over.
- **Review after completion**
  The 'Write a review' button appears only once the shop has marked the order completed.

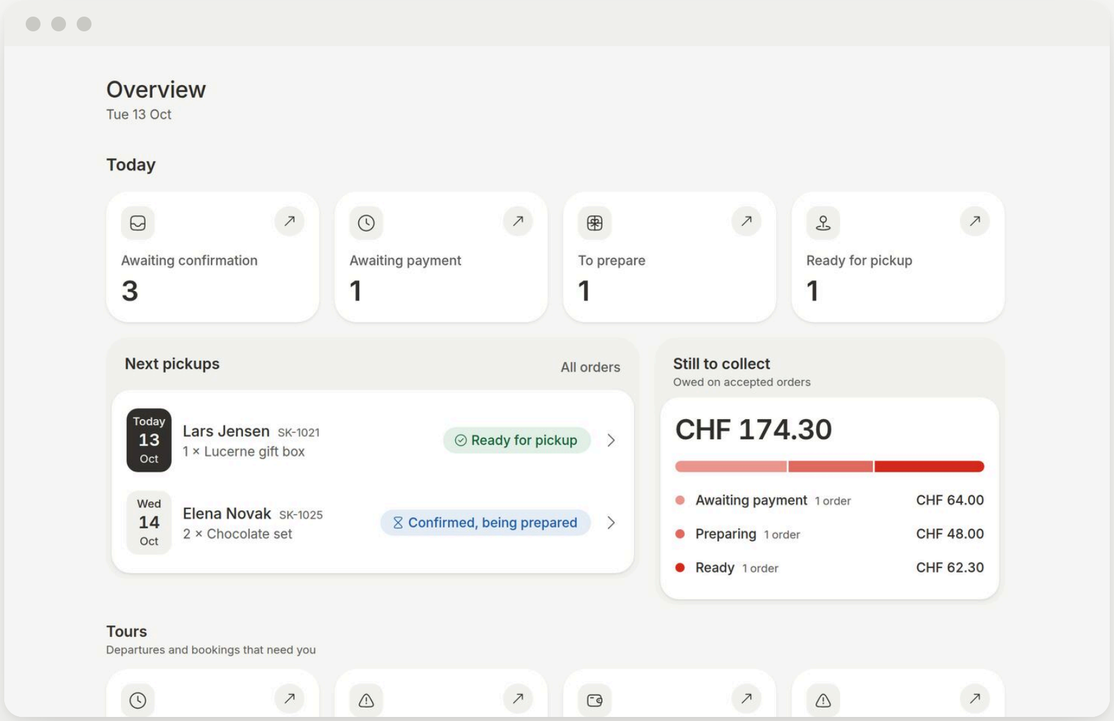
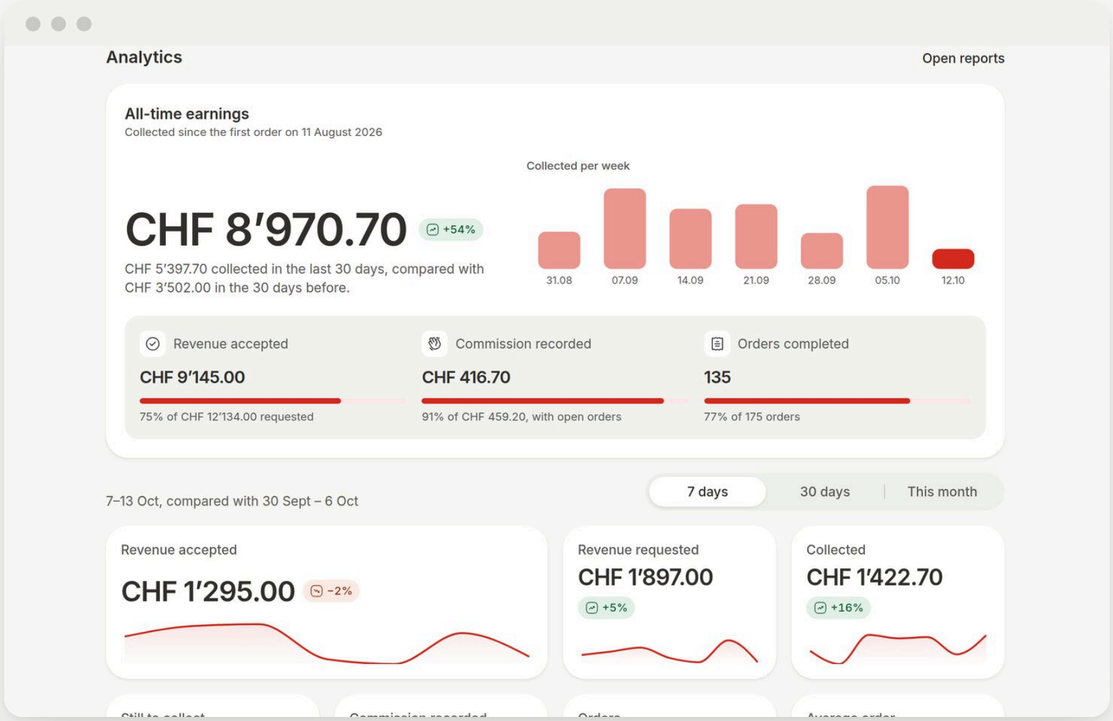
Overview: what needs you today

The first screen after sign-in lists every request, payment and tour result waiting for the team, so nothing is missed, then shows how the whole business is doing.

- **Today's task tiles**
  Counts of gift requests to answer, payments awaited, gifts to prepare or hand over. Each tile opens the matching filtered list.
- **Tour work**
  Tours that ended and need a result, overdue balances, bookings delivered but unpaid, and late payments to check.
- **Money still to collect**
  Shows what accepted orders and tour bookings still owe, with the next pickups and departures beside it.



Today's work

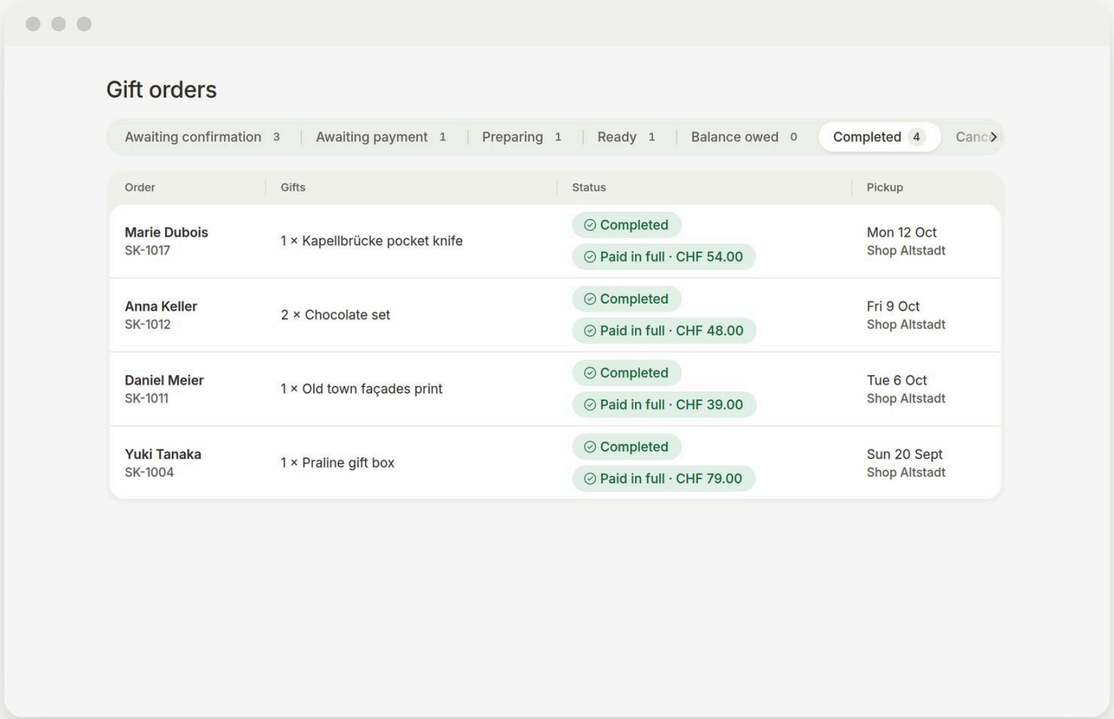


Earnings and trends

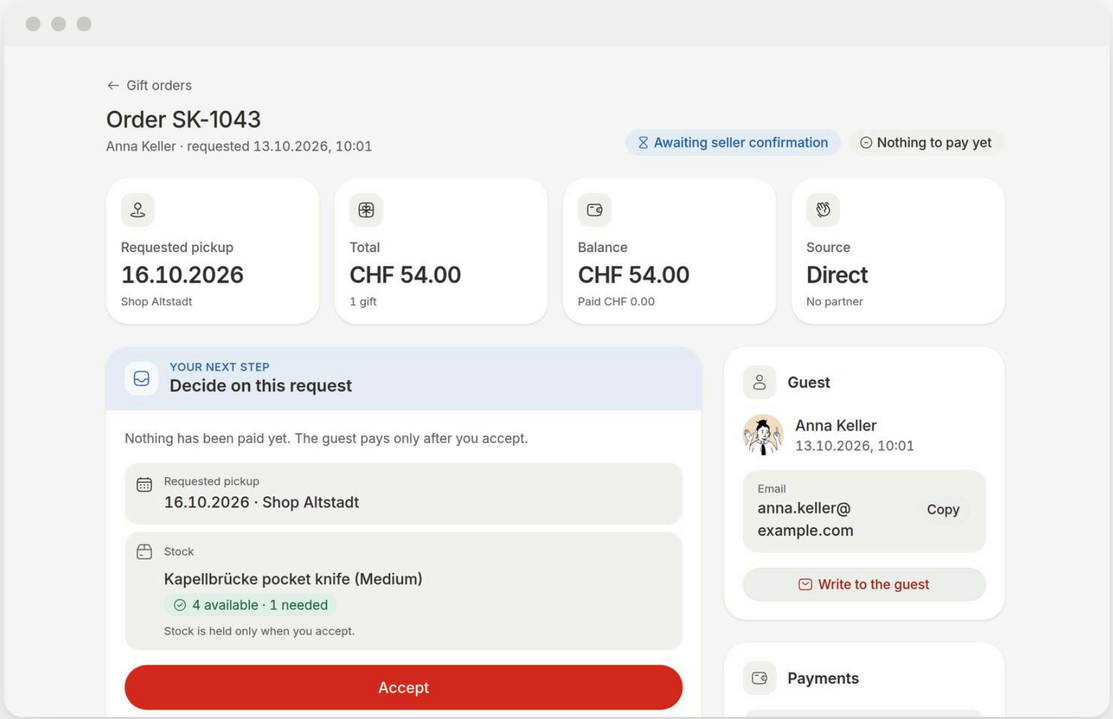
Handle gift orders step by step

Every gift request starts unpaid. The team confirms it can prepare the gift, and only then is the guest asked to pay.

- **Tabs by order stage**
  Awaiting confirmation, awaiting payment, preparing, ready, balance owed, completed and cancelled, each with a live count.
- **Accept, change or decline**
  Accepting holds the stock and asks the guest to pay within 24 hours. Changes and declines need a note.
- **Complete only when paid**
  An order can be completed only after handover and full payment. Partner commission is then recorded once.



Orders by stage

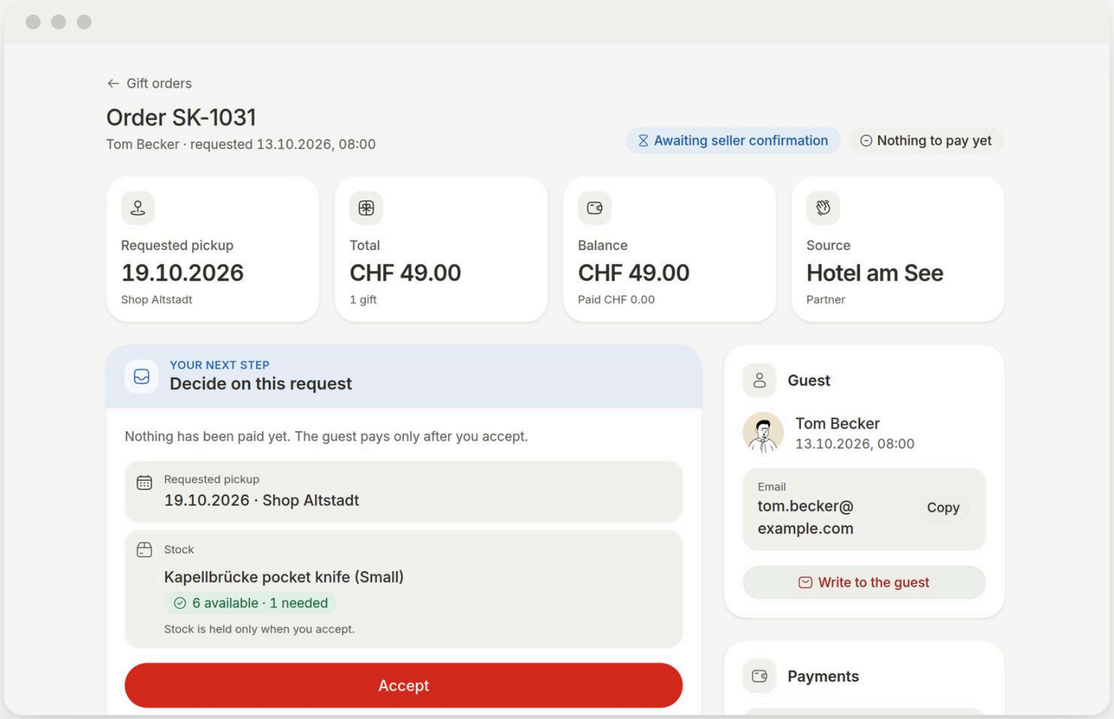


A request to decide

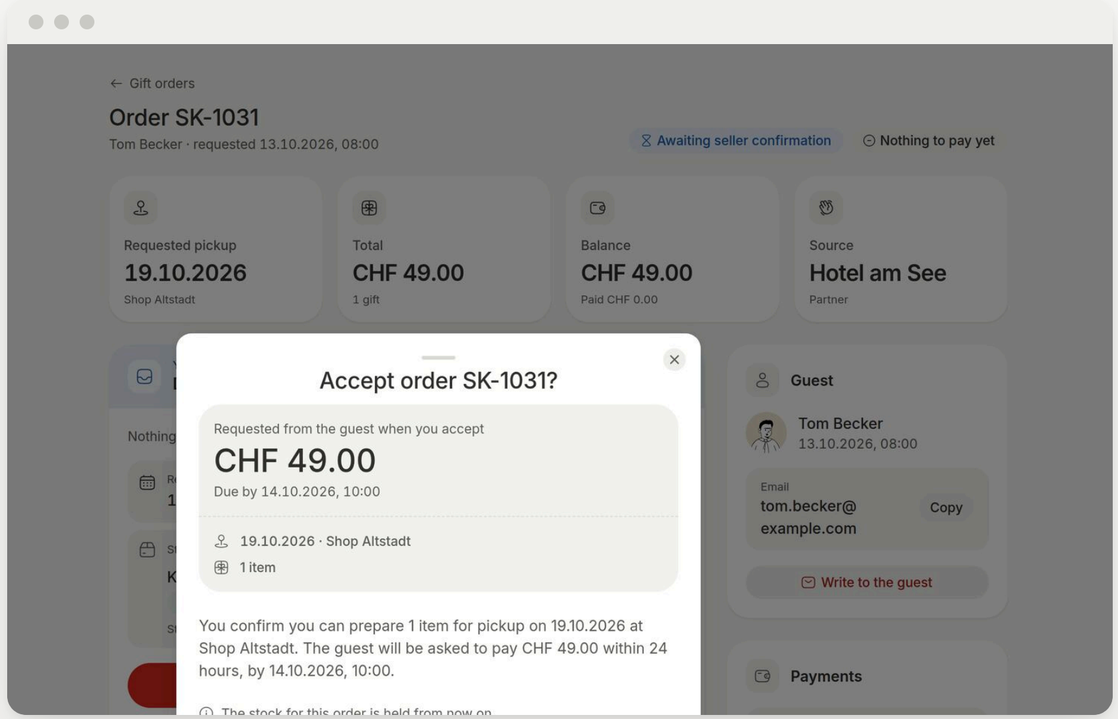
Decide on a new gift request

A request shows who asked, what they want, the pickup date and place, and the stock for each item. Nothing is paid until the shop accepts.

- **Stock checked per item**
  Each line shows how many are available against how many are needed. Stock is held only when you accept.
- **Clear confirmation**
  Accepting states the pickup date and place and the amount the guest must pay, with a 24-hour deadline.
- **Source and policy visible**
  The partner who brought the guest and the payment and cancellation terms from order time sit on the same page.



Request to decide

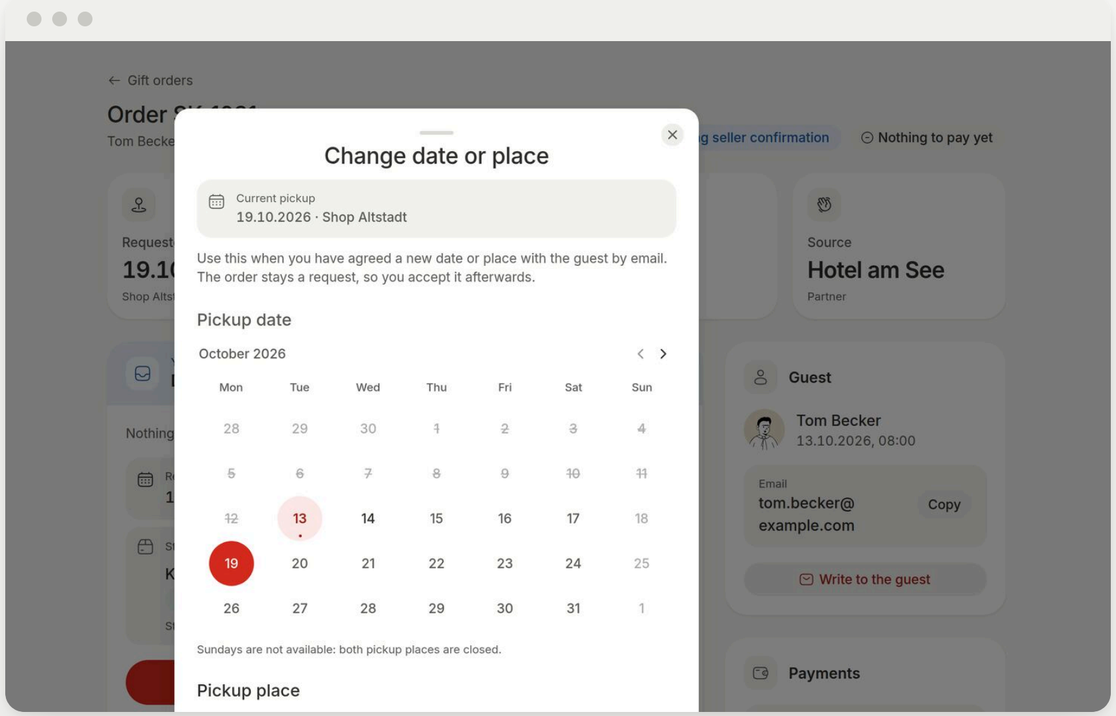


Accept confirmation

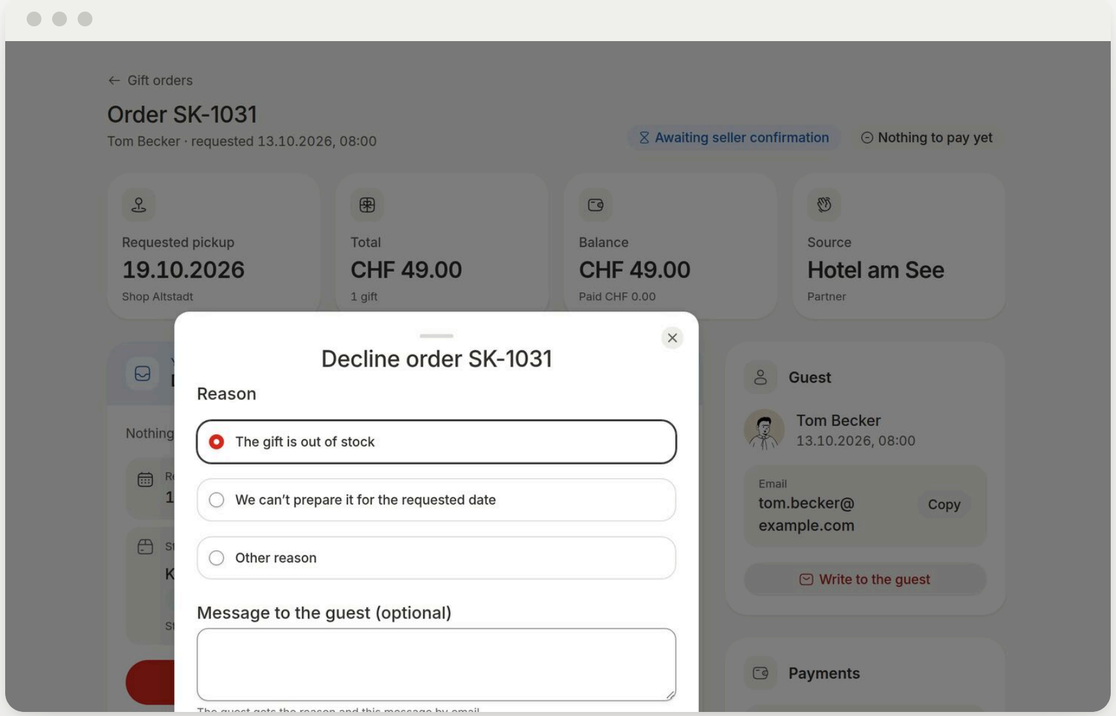
Change the date or place, or decline

When the requested pickup does not work, the shop can agree a new date or place with the guest, or decline with a reason the guest receives.

- **Only valid dates offered**
  The calendar greys out past days and Sundays, when both pickup places are closed. A note to the guest is required.
- **Still a request**
  A changed order stays unconfirmed until the shop accepts it, so the guest never pays for a date nobody confirmed.
- **Decline with a reason**
  Pick a reason and add an optional message. The guest gets both by email, and other orders are unaffected.



Change date or place

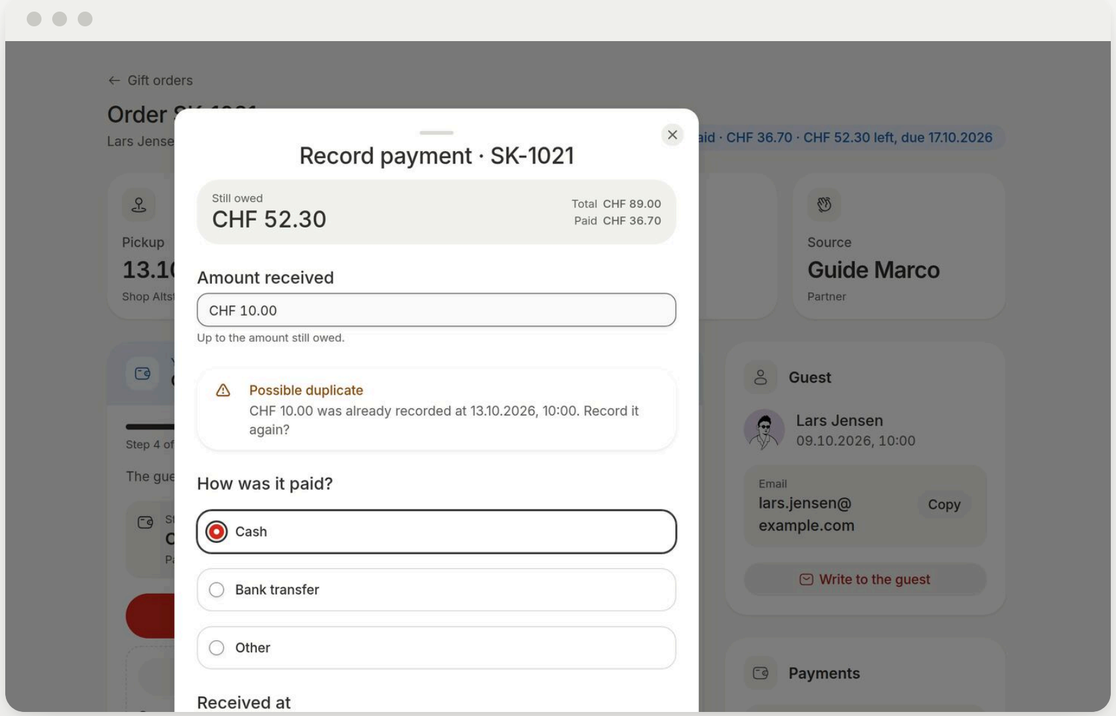


Decline with reason

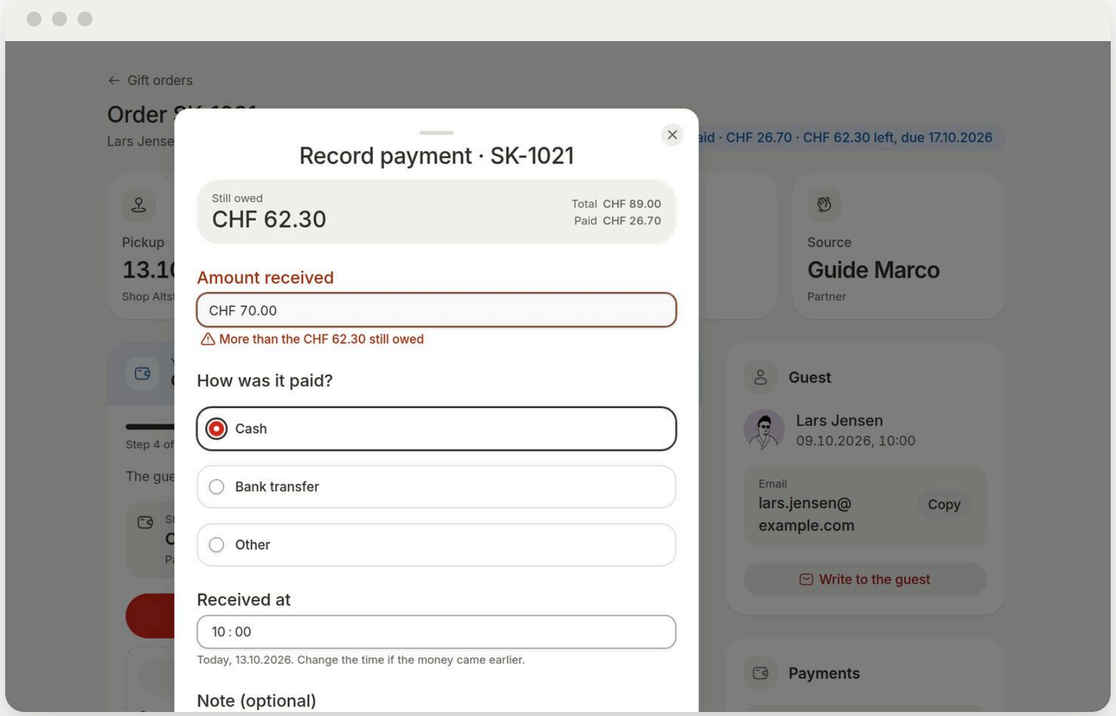
Record cash and bank payments safely

Guests may pay at the shop or by bank transfer. The team records that money here, and the order's balance updates at once.

- **Cash, bank transfer or other**
  Choose how it was paid and when it arrived. The button states the result: Record CHF 62.30 cash, balance CHF 0.00.
- **Duplicate warning**
  Recording the same amount again within 10 minutes shows a Possible duplicate warning before anything is saved.
- **No overpayment**
  An amount above what is still owed is blocked with a clear message, so balances stay correct.



Duplicate warning

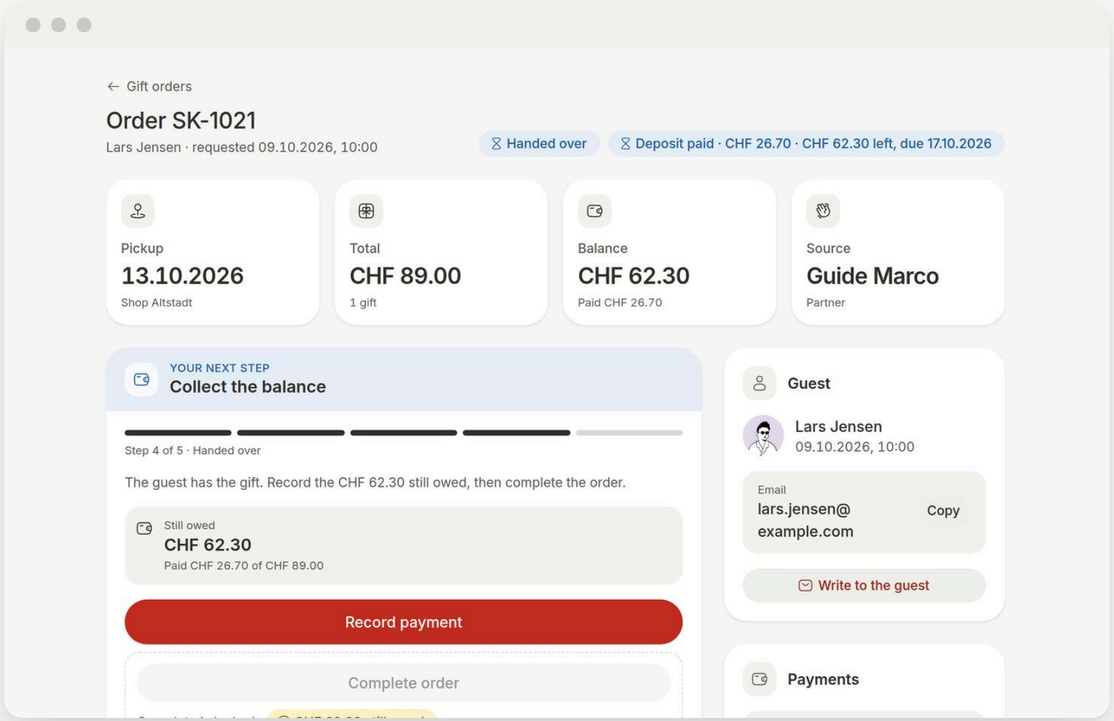


Amount above balance

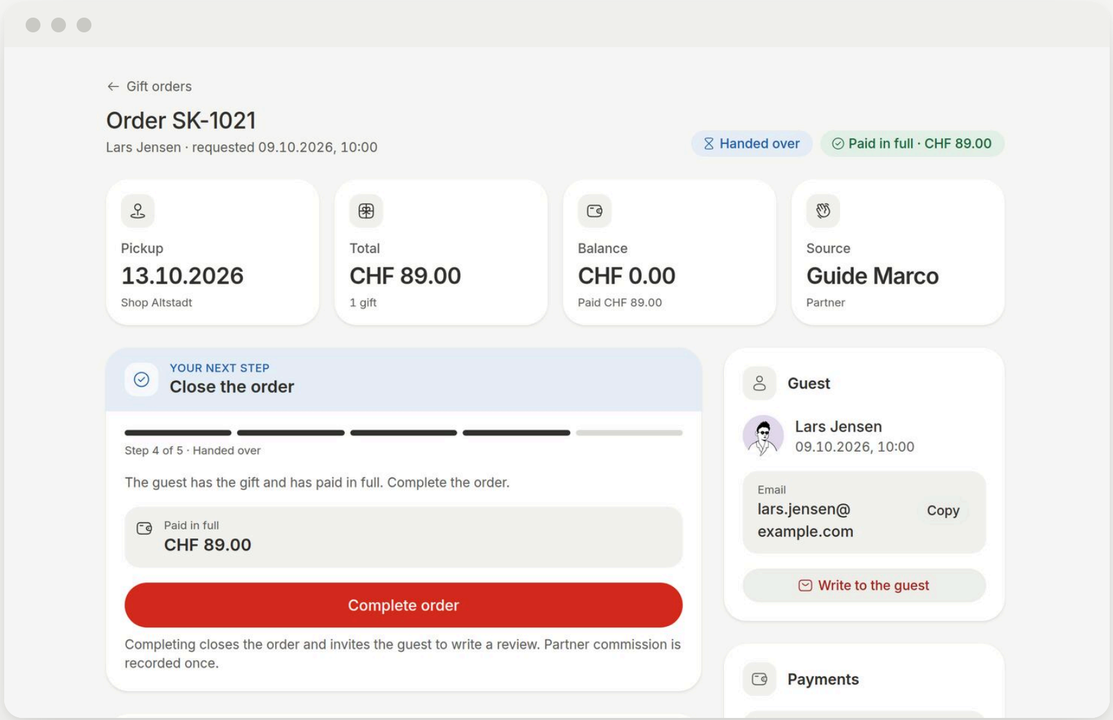
Hand over, collect the balance, complete

Marking a gift handed over does not close the order. Completion unlocks only when the guest has paid in full.

- **Five visible steps**
  A progress bar runs from Accepted through Preparing, Ready and Handed over to Completed, with the next step named.
- **Locked while money is owed**
  Complete stays locked with the reason, such as CHF 62.30 still owed on a 30% deposit order.
- **Commission recorded once**
  Completing logs who did it and when, records the partner commission once and invites the guest to review.



Handed over, balance owed

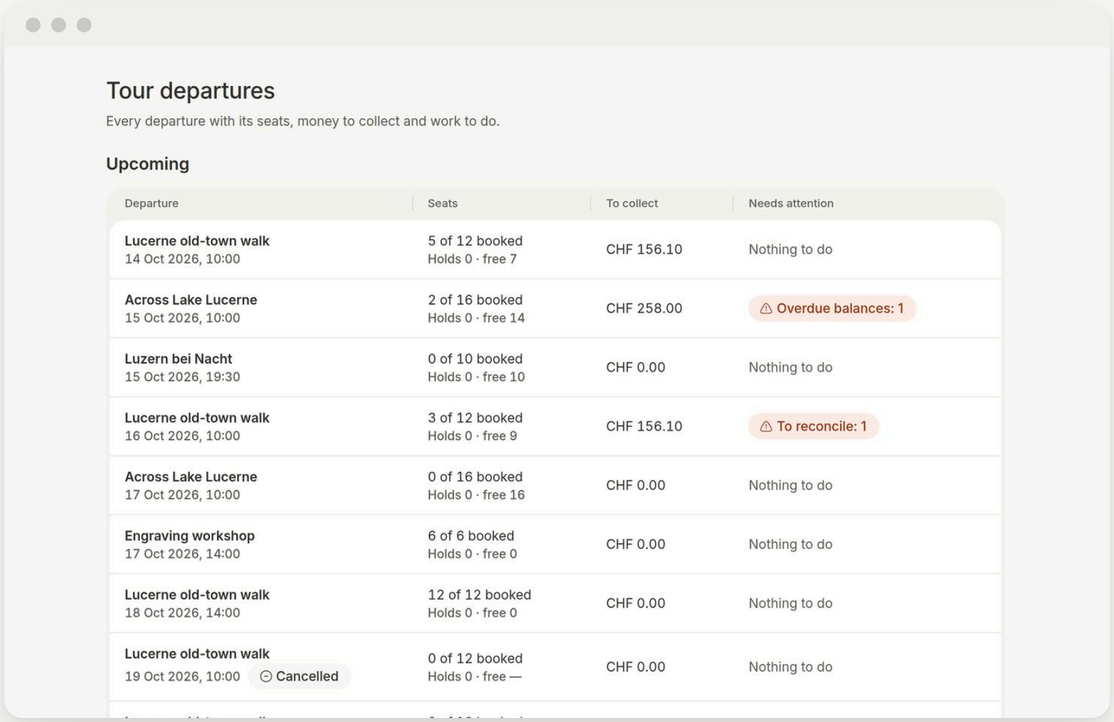


Paid in full, ready to complete

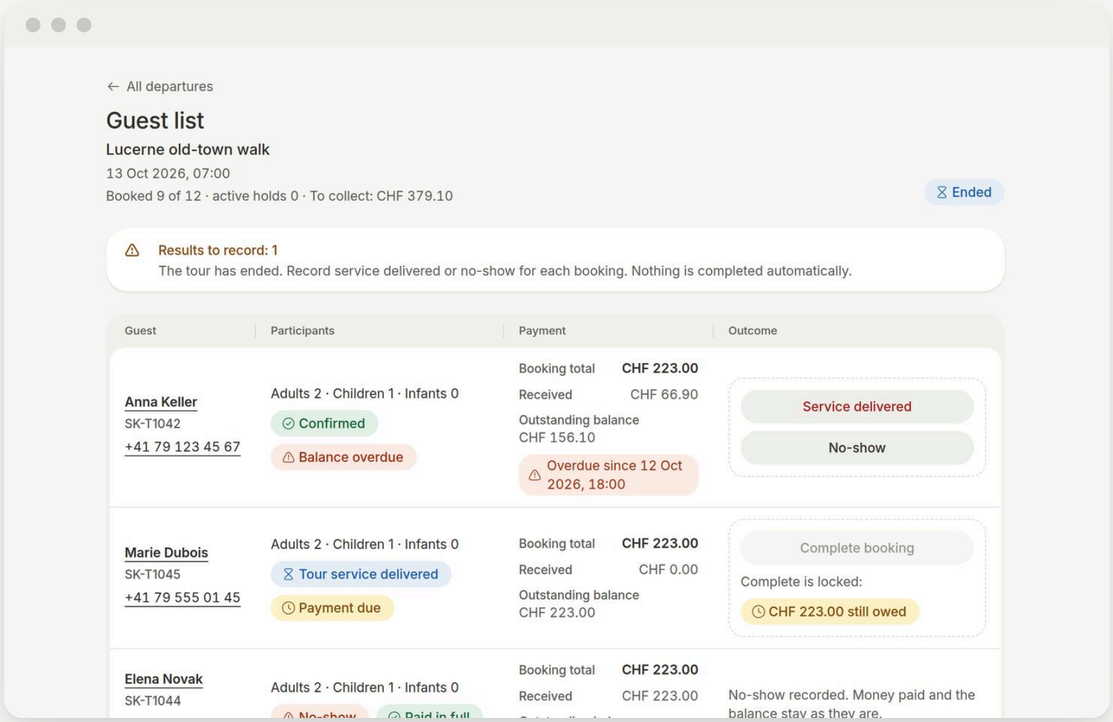
Manage tour departures and guest lists

A departure is one dated run of a tour. The schedule shows how full each one is and who still owes money, then opens the guest list.

- **Seats and holds apart**
  Confirmed seats and temporary 15-minute holds are counted separately, so a seat is never sold twice.
- **Money to collect**
  Each departure shows the unpaid balance of its bookings, and flags overdue balances and late payments.
- **Result per booking**
  After the tour ends, mark each booking Service delivered or No-show. Nothing is completed automatically.



All departures

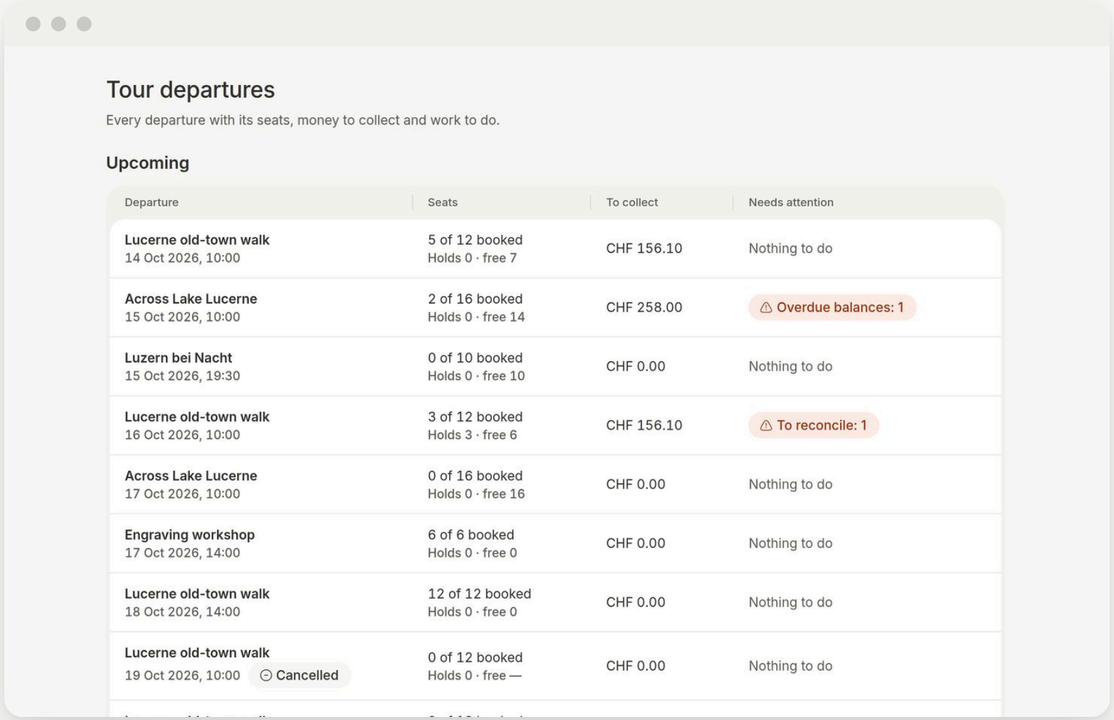


Guest list of one tour

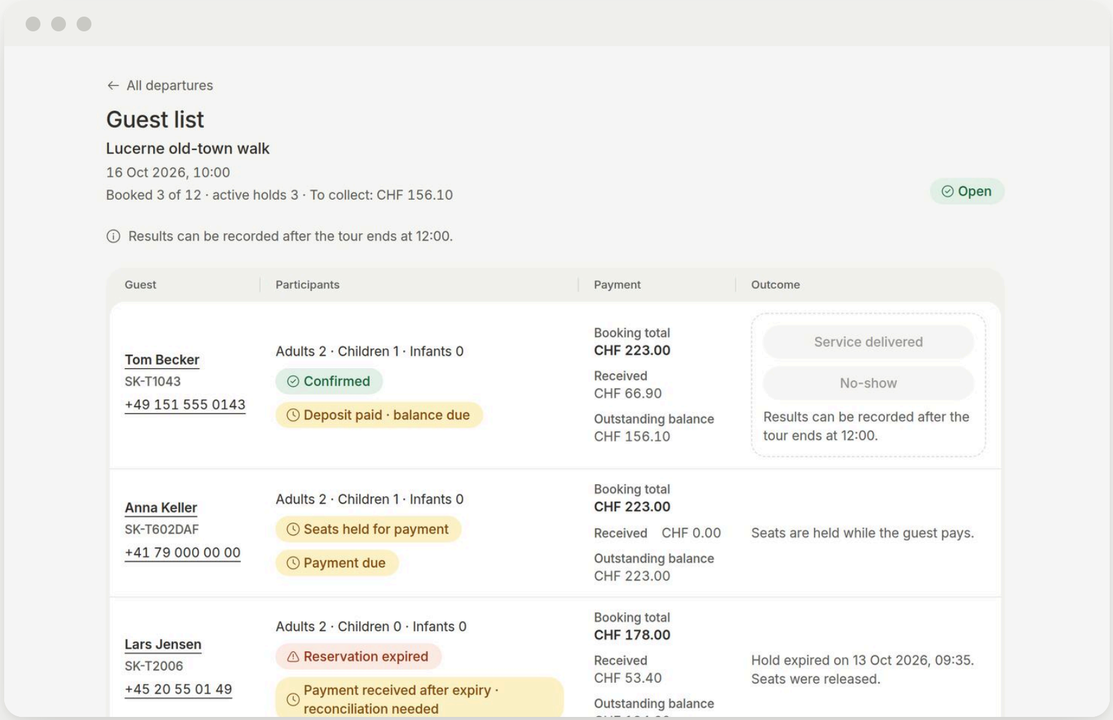
Seats sold versus seats on hold

While a guest is paying, their seats are held for 15 minutes. The guest list shows confirmed bookings and held seats side by side.

- **Booked and holds counted apart**
  The schedule reads, for example, 3 of 12 booked, Holds 3, free 6. Held seats cannot be taken by others.
- **Pending guests are marked**
  A booking waiting for its first payment shows Seats held for payment until it is paid or the hold expires.
- **Late payments flagged**
  If money arrives after a hold expired, the booking stays expired and the departure shows To reconcile.



Departure schedule

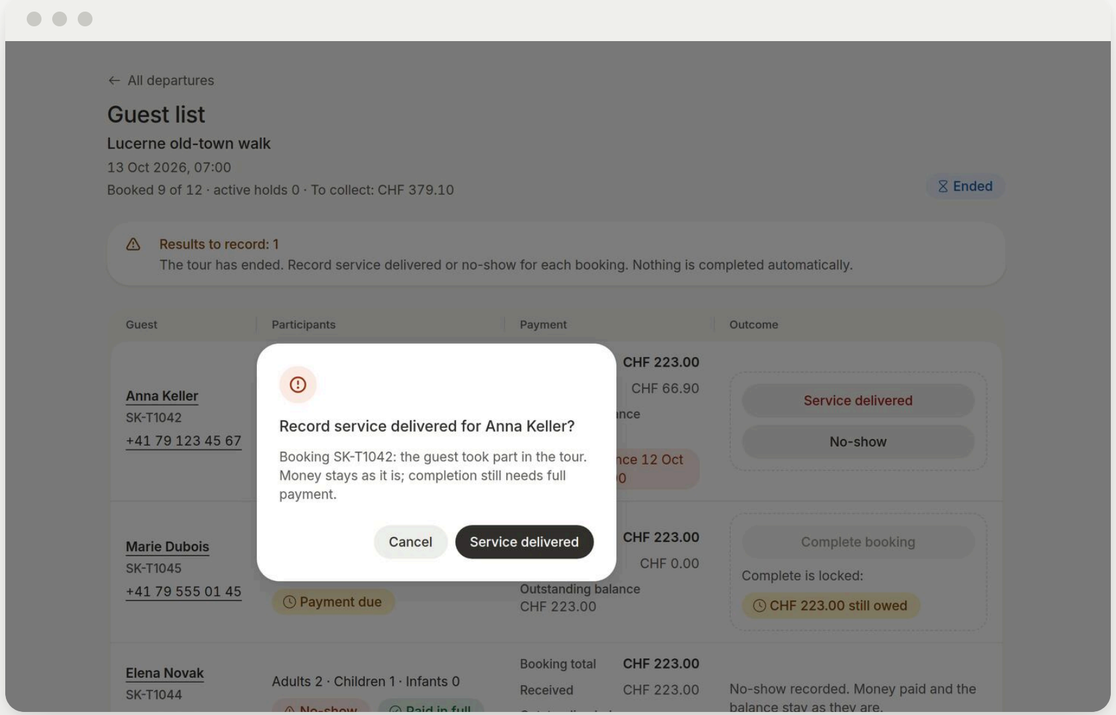


Guest list with a hold

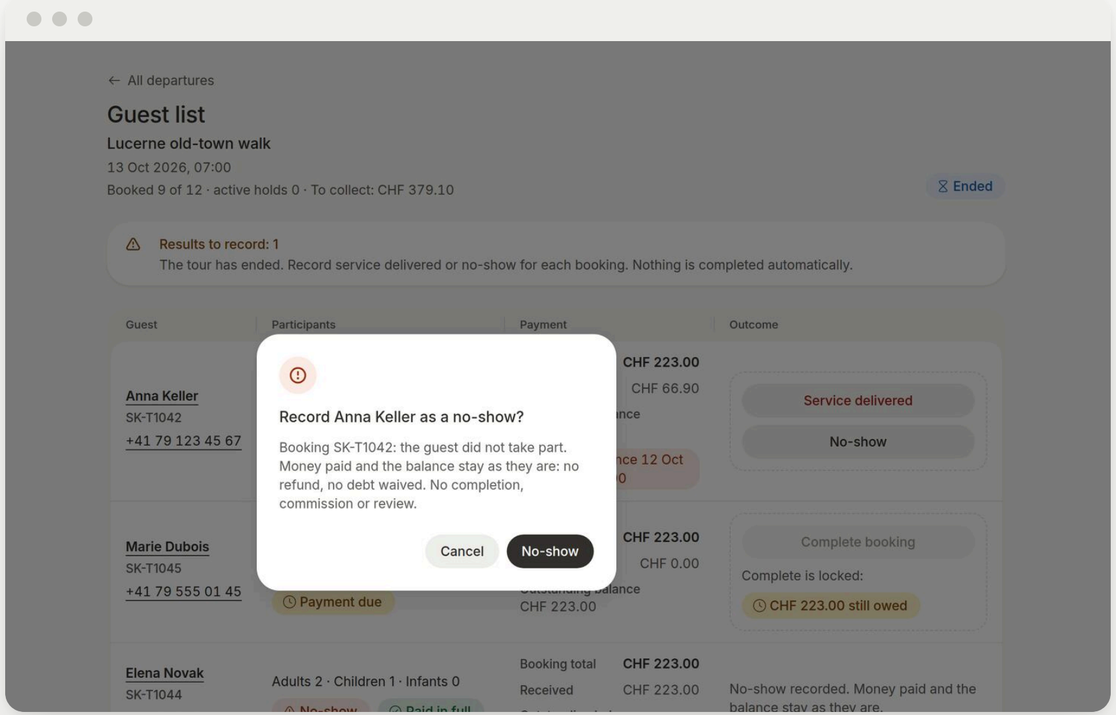
Record who came and who did not

After a tour ends, the team marks each booking. A confirmation explains exactly what the choice does to money, commission and reviews.

- **Only after the tour ends**
  Buttons stay disabled, with the end time shown, until the tour is over. Nothing is completed automatically.
- **Service delivered**
  Confirms the guest took part. Money stays as it is, and completion still needs full payment.
- **No-show**
  Money paid and the balance stay as they are: no refund, no debt waived, no commission and no review.



Service delivered

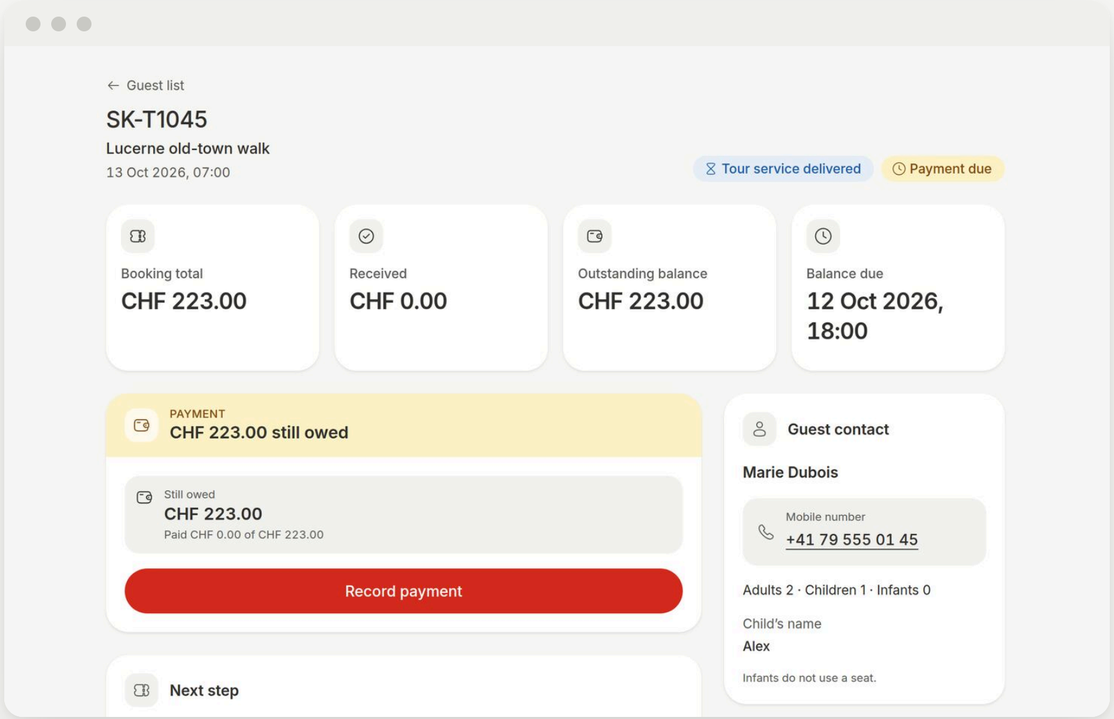


No-show

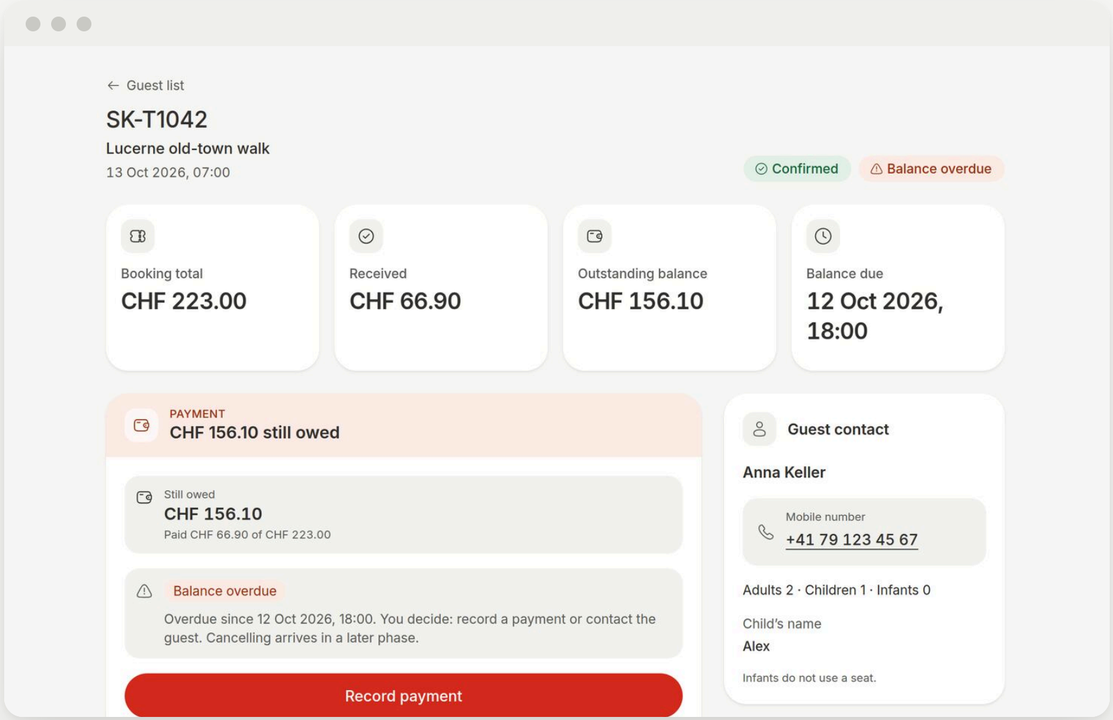
Booking detail, payments and completion

One page holds everything about a tour booking: what the guest agreed to, money received and owed, and the next step for the team.

- **Terms as booked**
  Price, payment rule and cancellation policy are saved at booking, so later tour changes never alter this booking.
- **Overdue balances**
  Each departure's saved rule decides: cancel and release seats after the deadline, allow a grace period, or leave it to you.
- **Strict completion**
  Completion needs service delivered and full payment. A no-show never earns commission or a review.



Booking detail

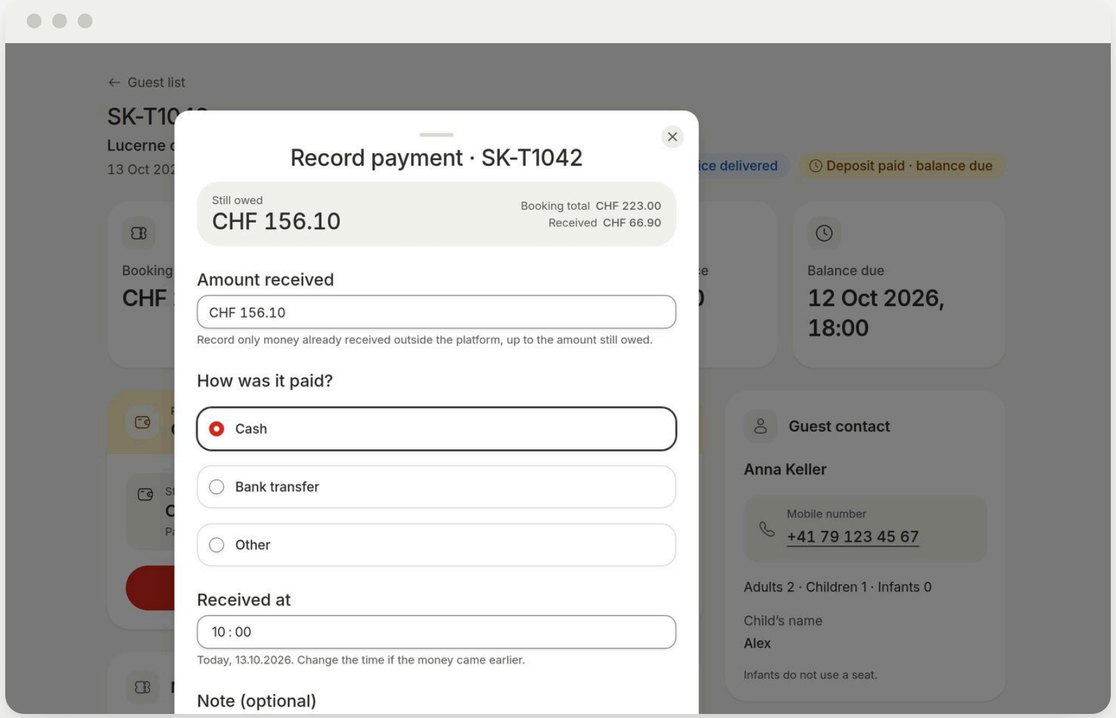


Overdue balance

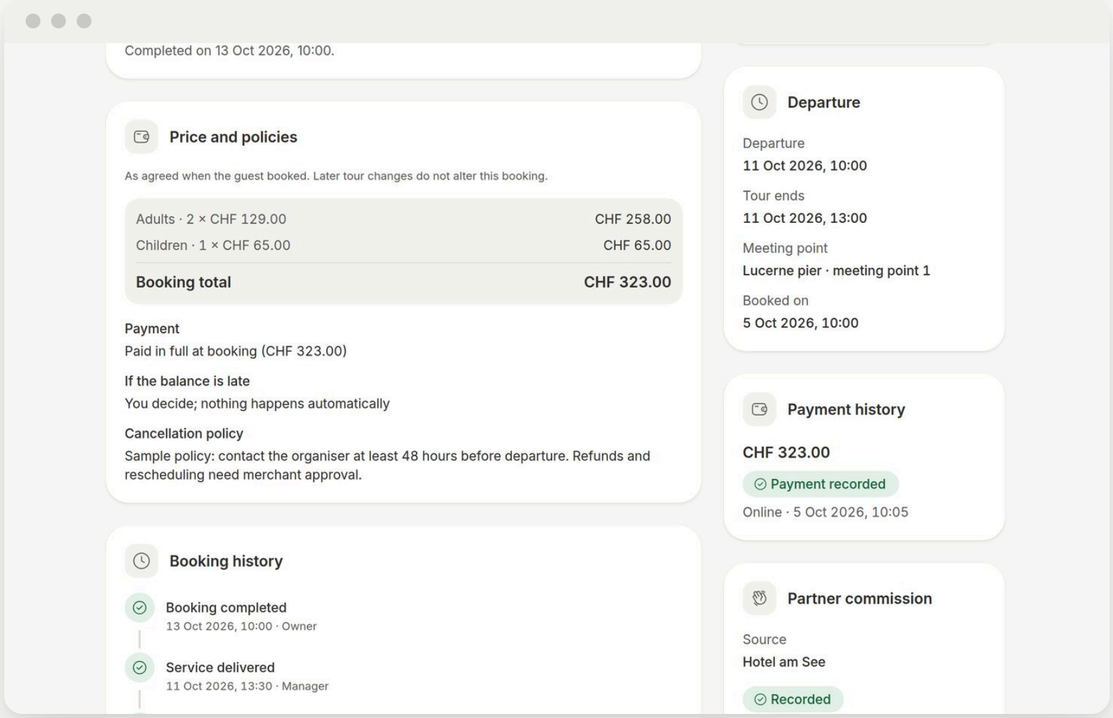
Collect the balance and complete a booking

A guest who took part but still owes money can pay the team directly. Once the balance is zero, the booking can be completed.

- **External payments only**
  The sheet records money already received outside the platform, up to the amount still owed, by cash, bank transfer or other.
- **Complete asks to confirm**
  The dialog says commission is recorded once and the guest can review the tour.
- **Full history kept**
  Booking history lists each step with who and when, and the commission line changes from estimated to recorded.



Record a payment

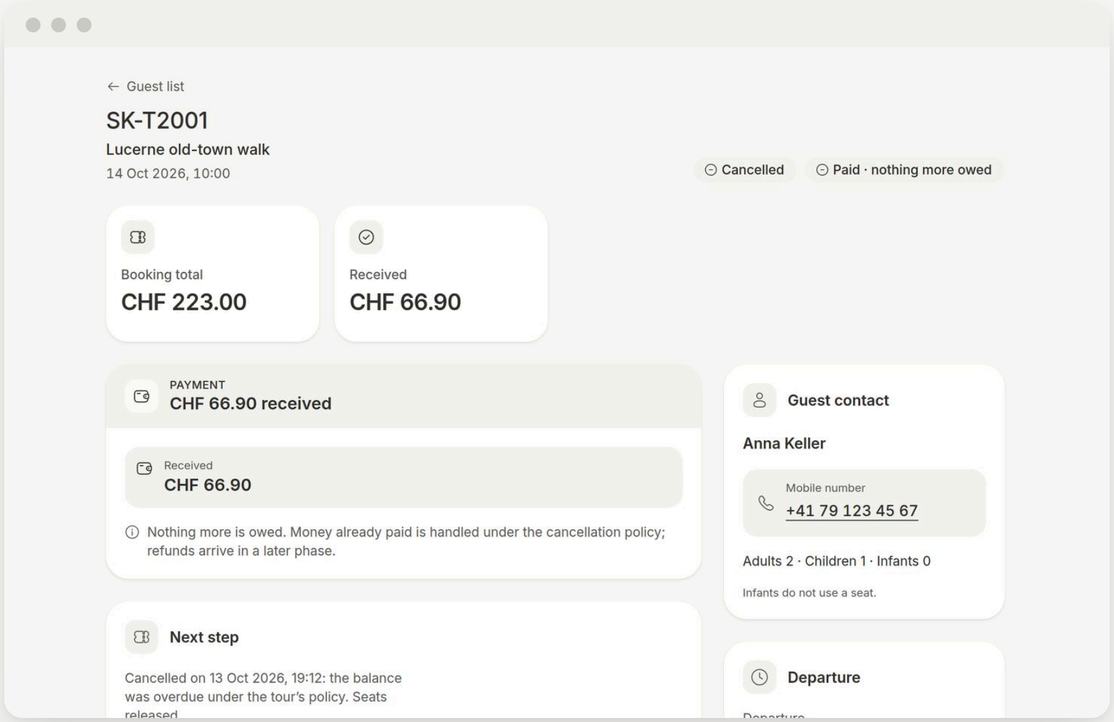


Completed with history

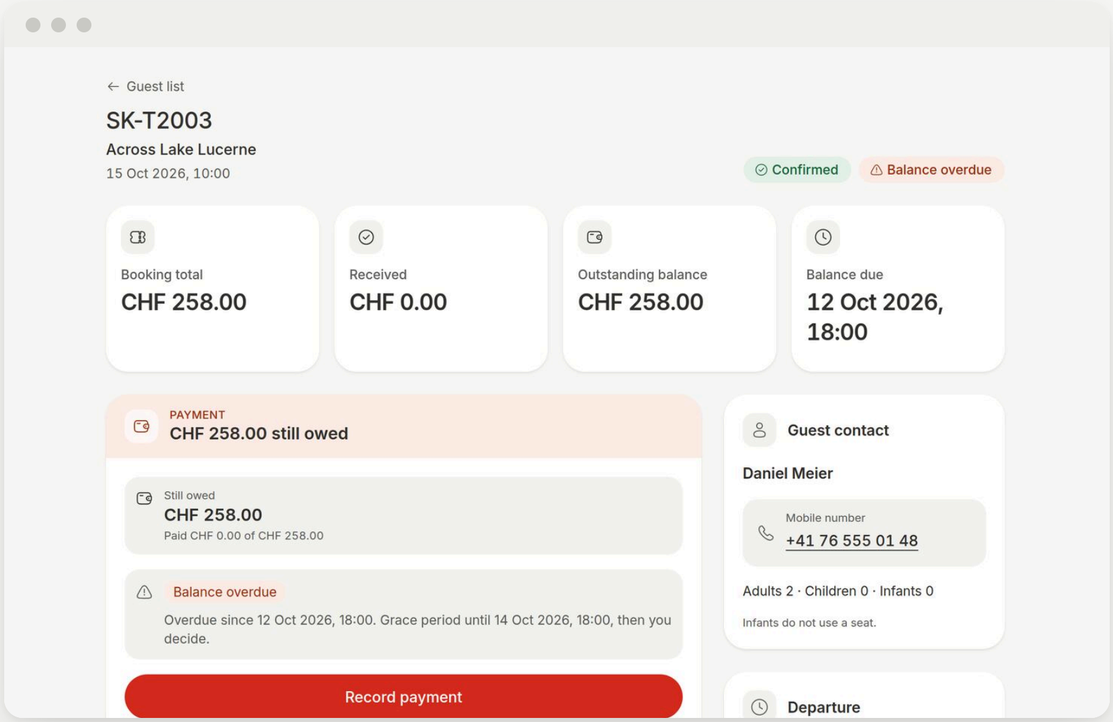
What happens when a balance is late

Each departure saves its own rule for unpaid balances at booking time. The shop sees the result without chasing each case.

- **Cancel and release seats**
  Under this rule the booking is cancelled at the next check after the deadline, and the seats are free again.
- **Grace period**
  Another rule waits a set time, such as 48 hours, and shows the date until which the guest may still pay.
- **Paid money is kept**
  Cancellation keeps what was already paid on record. Refunds are not part of this version of the product.



Cancelled by policy

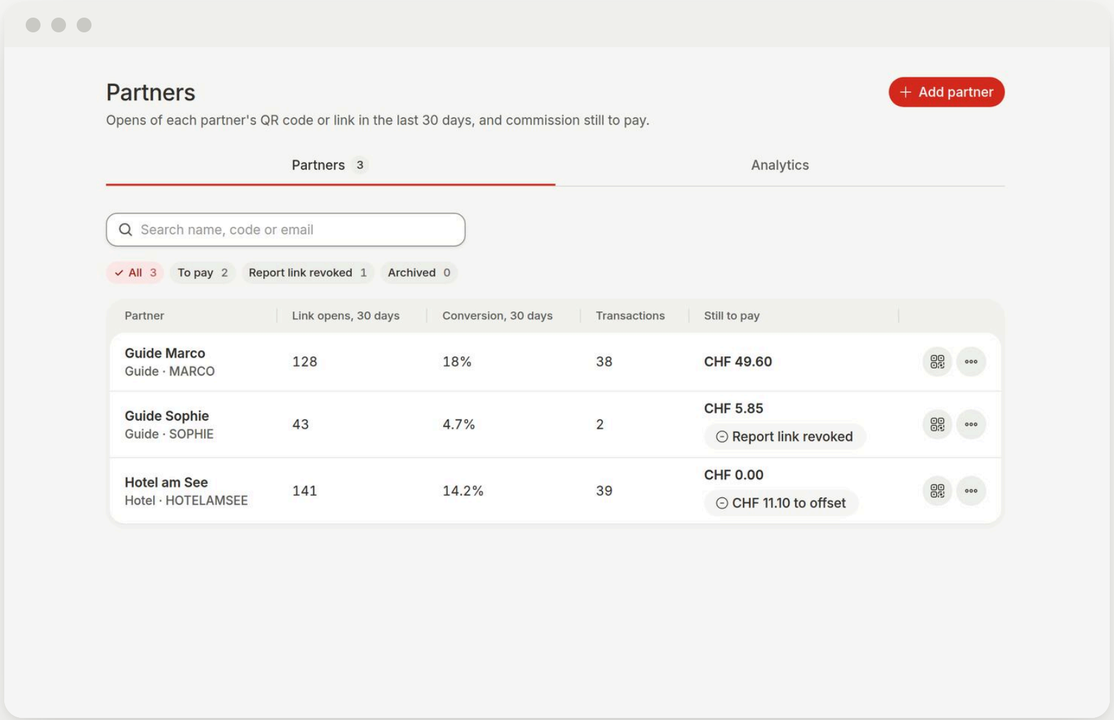


Grace period

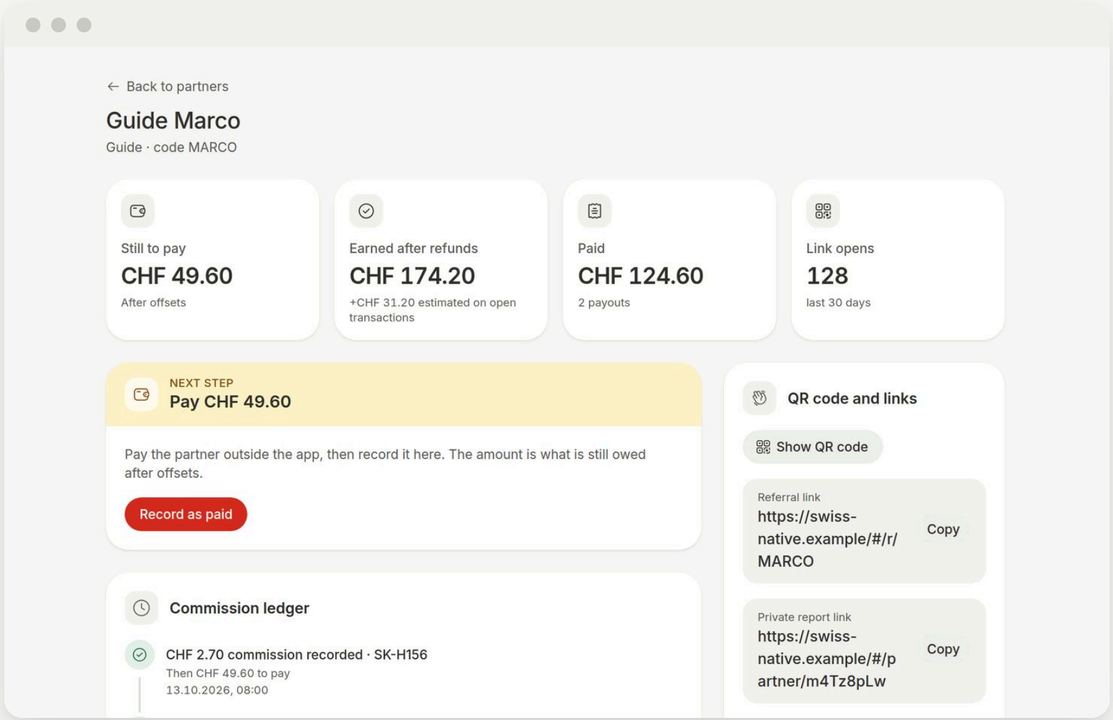
Manage your referral partners

Partners are hotels, guides or others who send you guests; each gets a personal link and QR code so you can see what their guests buy.

- **Search and filter partners**
  Find a partner by name, code or email, or show only those you still owe commission.
- **Link opens, never 'scans'**
  The list counts how often each link was opened in 30 days, plus the guests who then bought.
- **Source on every sale**
  A guest who opens a partner link sees the normal shop; their orders for the next 30 days count for that partner.



Partners

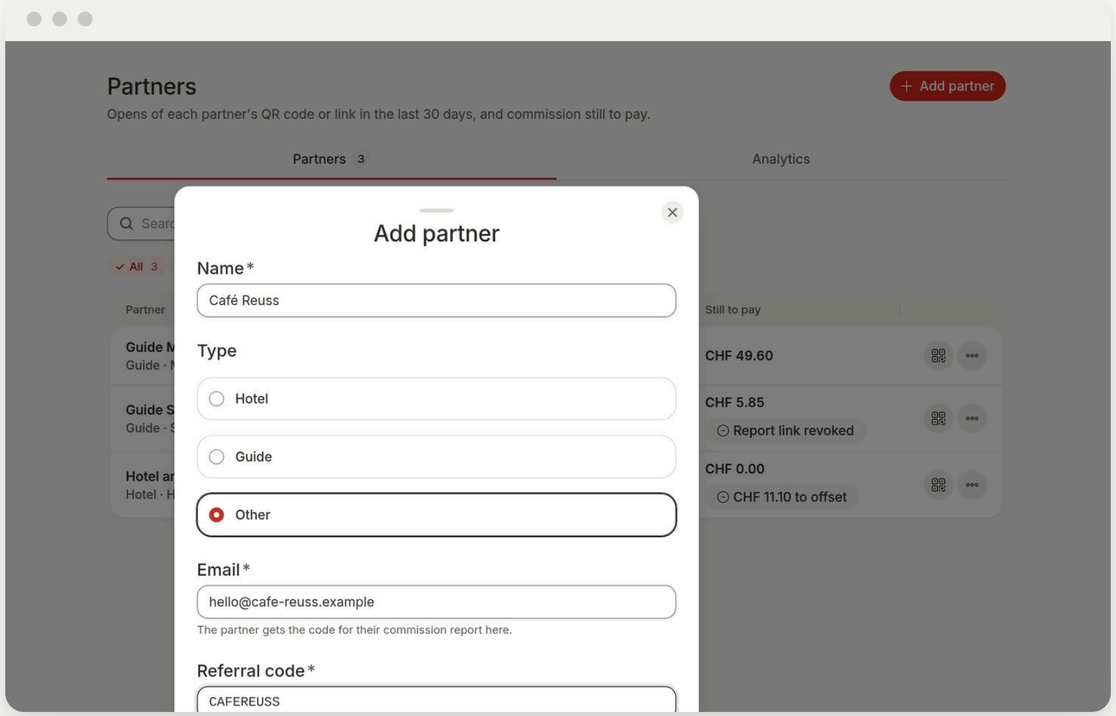


Partner detail

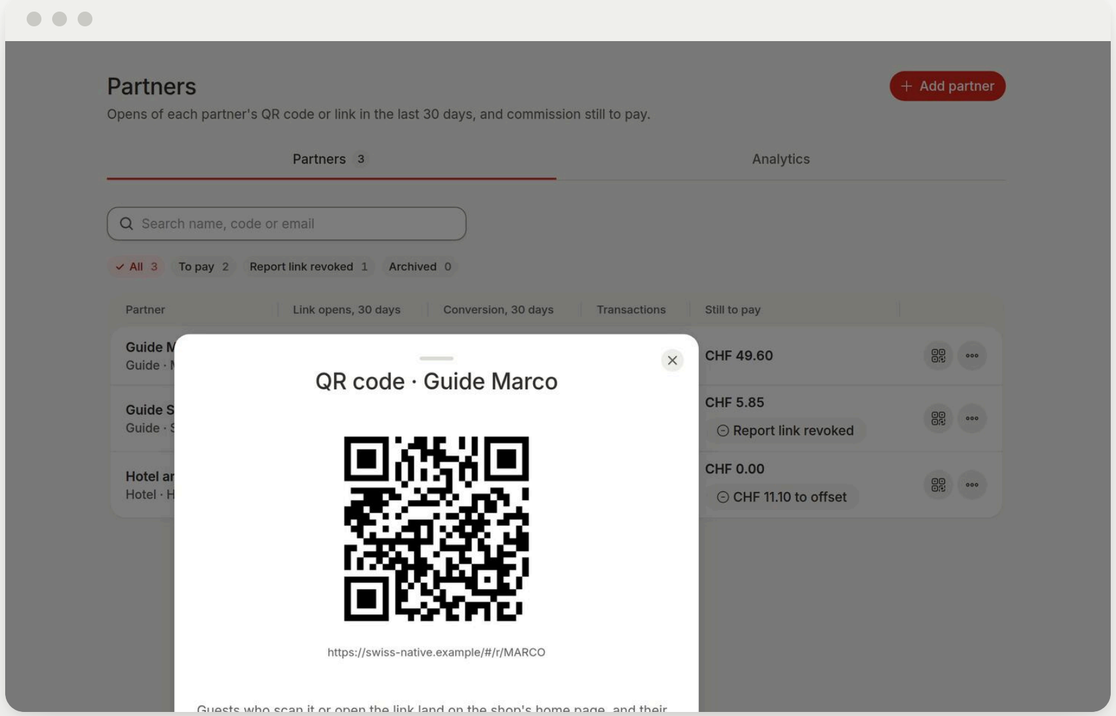
Add a partner and print their QR code

Adding a partner takes four fields; the shop then gets a QR code and link to hand out, and every guest who opens it is credited.

- **Four fields**
  Name, type (hotel, guide or other), the email that receives report codes, and a short referral code.
- **QR code to download**
  Save the QR code as a PNG for flyers or desks, or copy the link to share online.
- **Credit for 30 days**
  A guest who opens the link sees the normal home page; their orders in the next 30 days count for the partner.



Add partner

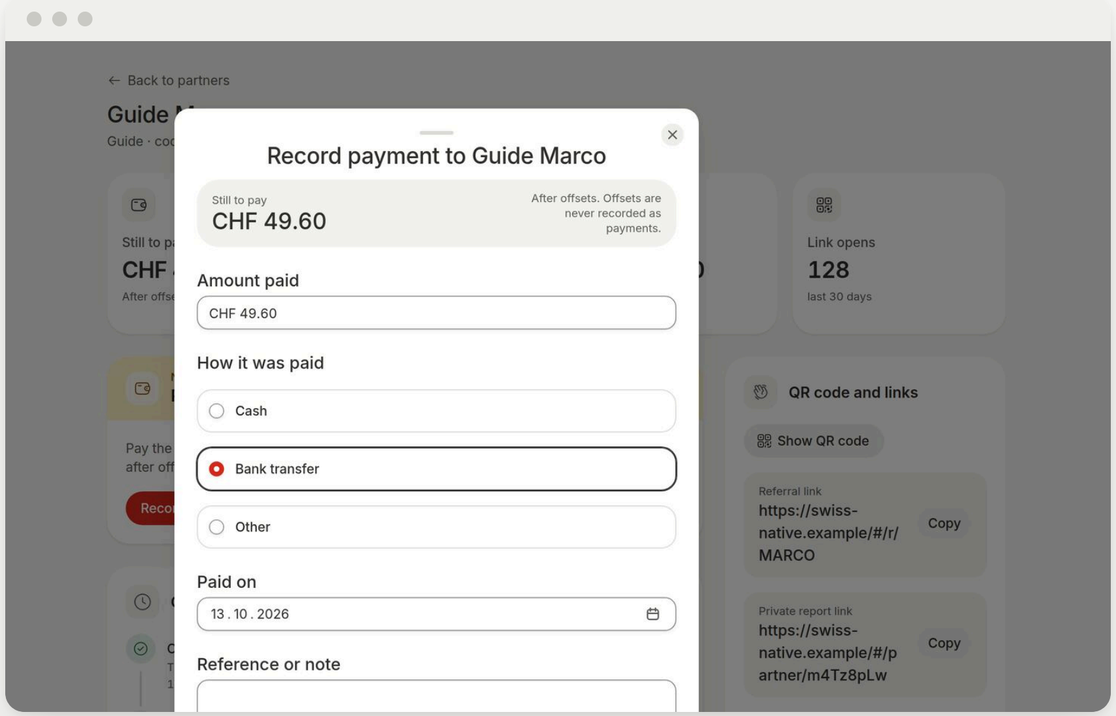


QR code

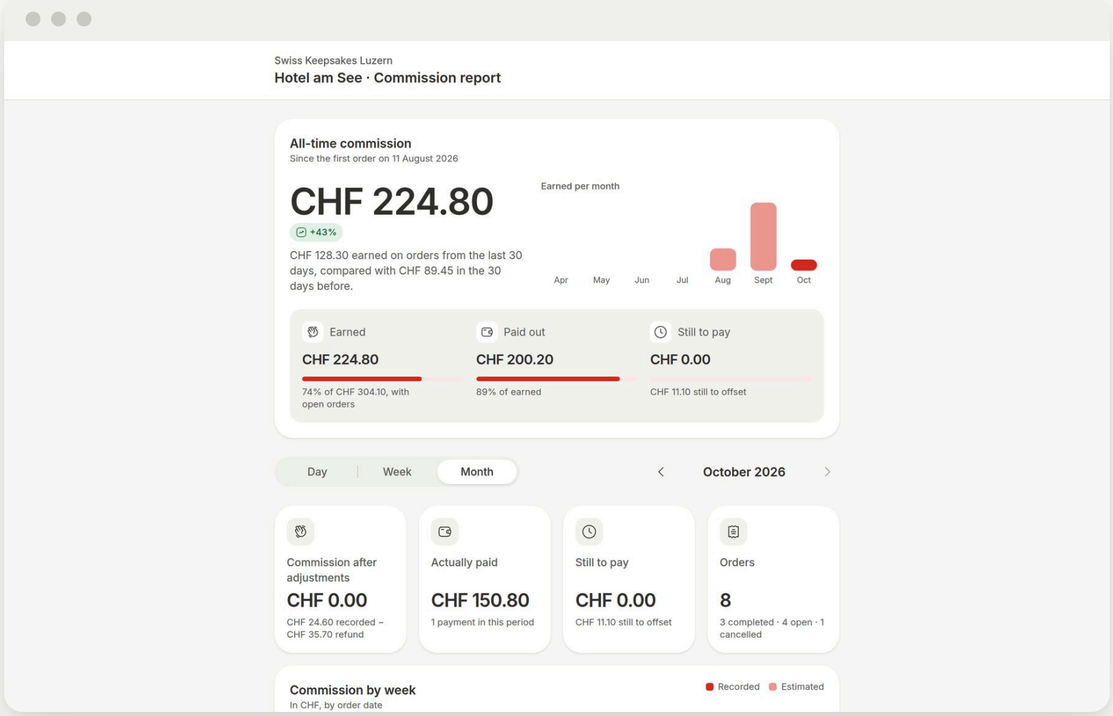
Commissions and payouts, fully tracked

The shop records each payment to a partner, and the partner sees the same figures in a private report without any guest contact details.

- **Pay what is owed**
  The amount to pay starts at what is still owed after offsets; the Owner or Manager picks method, date and a reference.
- **Offsets are not payments**
  If a refund lowers commission already paid, the next commissions are offset first and never shown as money paid.
- **Partner's own report**
  Day, week or month totals, commission paid and owed, with guest names only and no email, phone or notes.



Record a payment

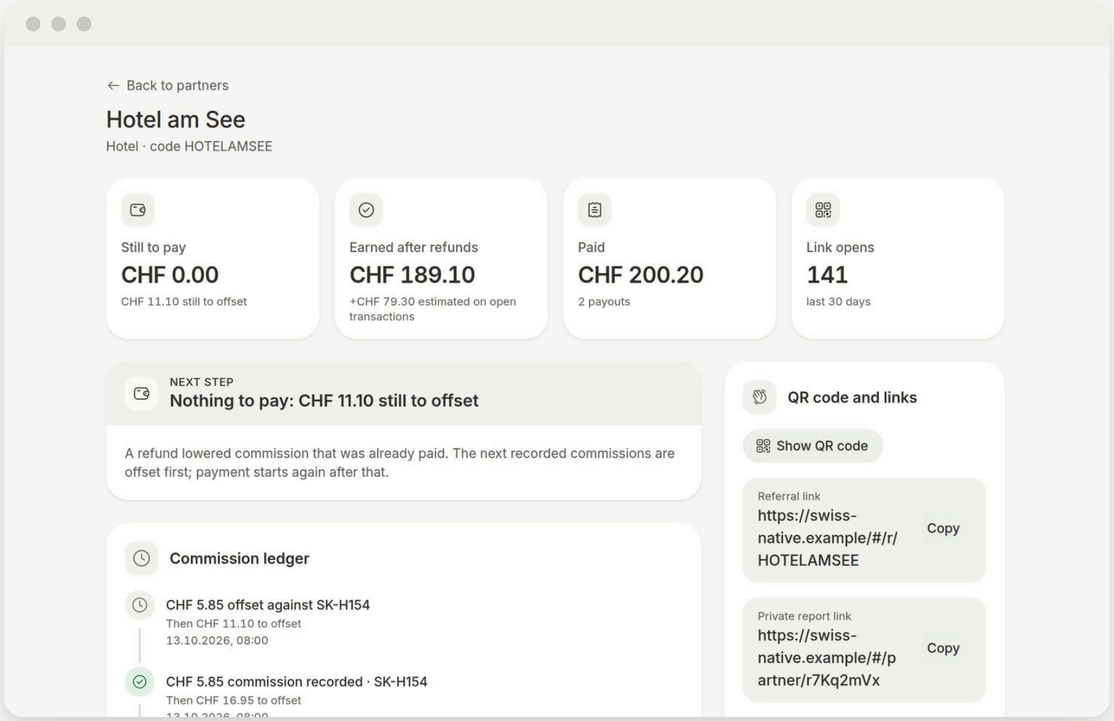


Partner's report

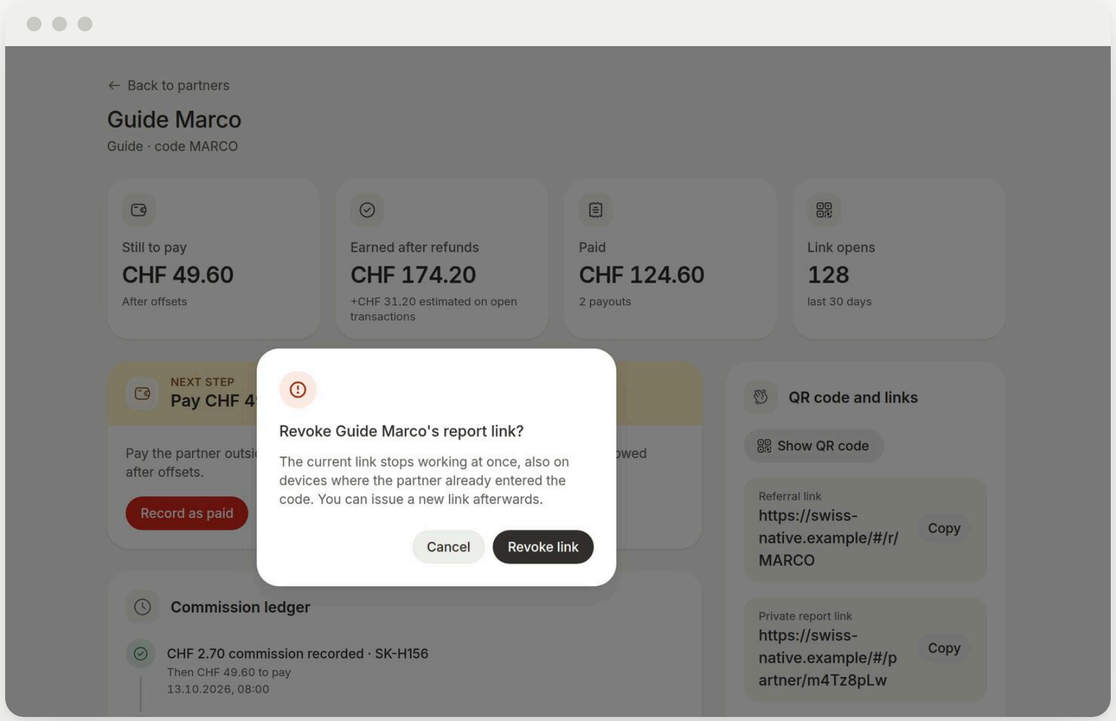
Refund offsets and report link control

When a refund cuts commission you already paid, the shop owes nothing until later commissions cover it, and the Owner can cut off a partner's report.

- **Never a negative payout**
  Hotel am See shows CHF 0.00 to pay and CHF 11.10 to offset; payments restart once later commissions cover it.
- **Ledger shows each step**
  Every sale, offset and payout appears in a dated list, newest first.
- **Revoke needs confirmation**
  Only the Owner can revoke a report link; it stops working at once on every device, and a new one can follow.



Nothing to pay, offset first

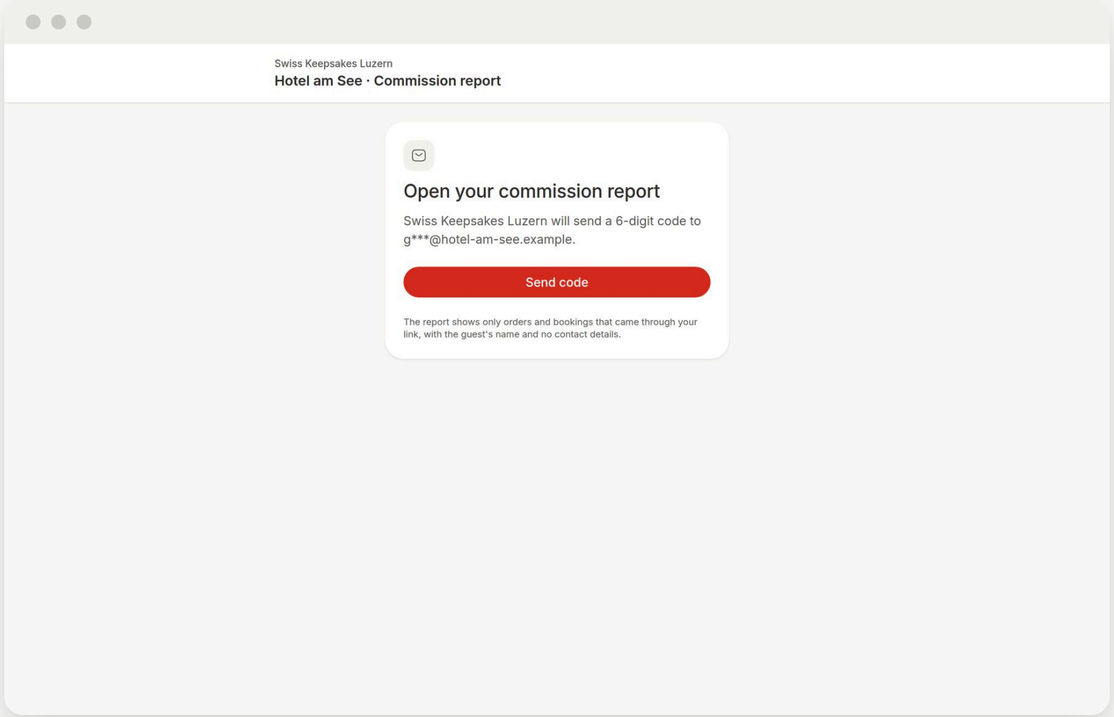


Revoke report link

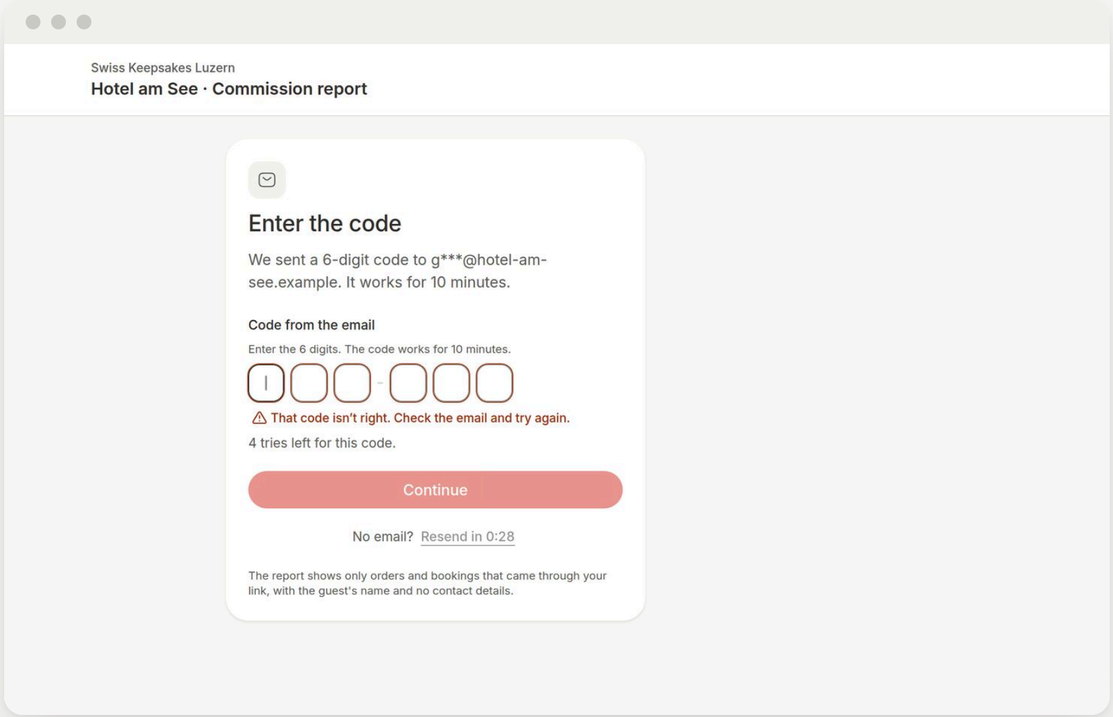
How a partner opens their report

Partners need no account: a private link plus a six-digit code sent to their email opens a report that only they can see.

- **Link plus emailed code**
  The page shows only a masked email; Send code mails a six-digit code that works for 10 minutes.
- **Wrong codes are limited**
  A wrong code shows an error and how many tries are left; too many asks for a new code.
- **Kept for 30 days**
  After the code, the same browser reopens the report directly for 30 days; a forwarded link still asks for a code.



Send code

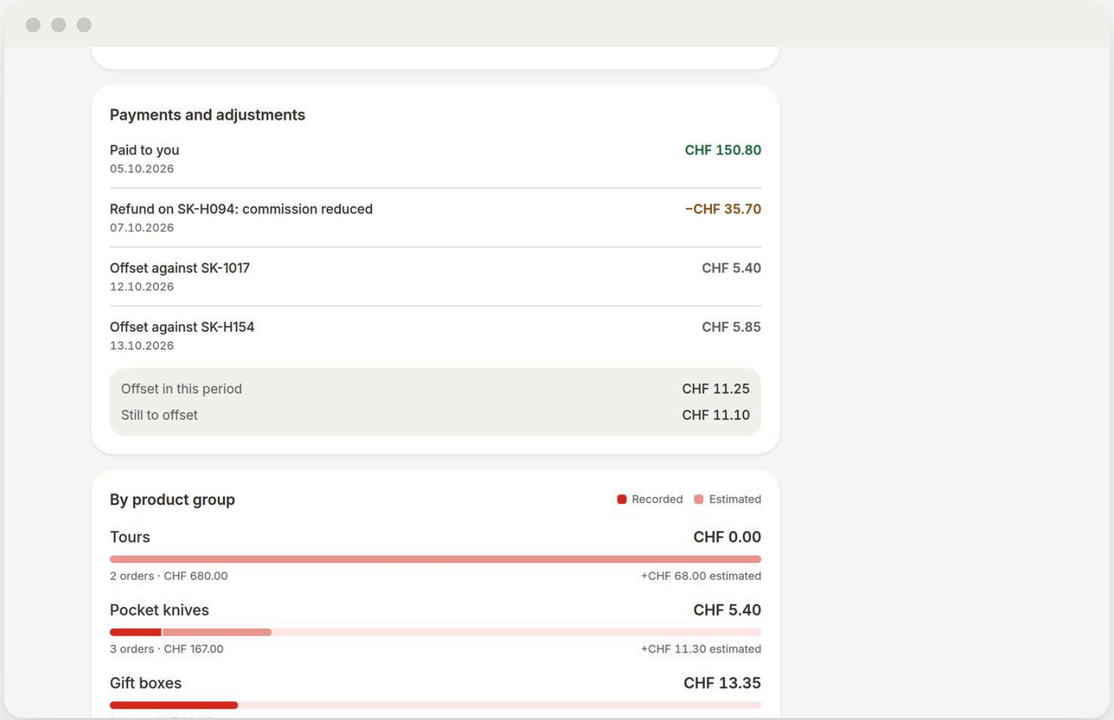


Enter the code

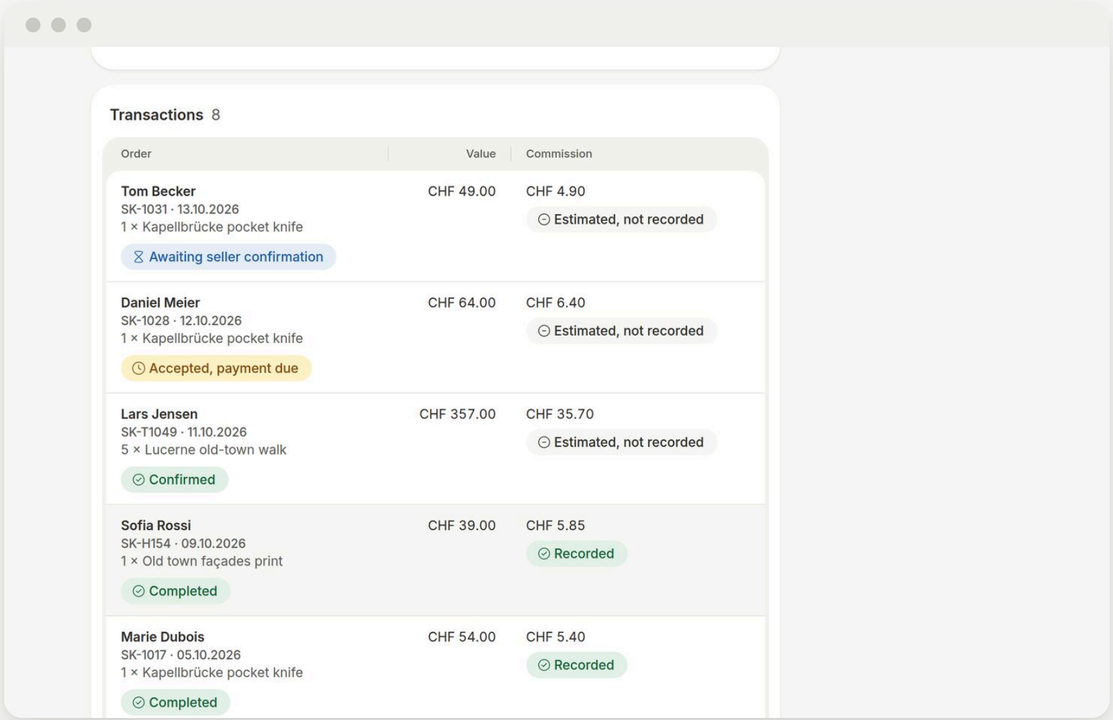
What the partner sees: paid, owed, orders

The report separates money actually paid from commission merely estimated, and lists each order the partner brought, so there is little to argue about.

- **Paid, refunded, offset**
  Payments received, refund reductions and offsets are listed apart, with CHF still to offset.
- **By product group**
  Commission is split by tours, knives, gift boxes and prints, recorded and estimated shown in two shades.
- **Orders without contact data**
  Each order shows guest name, products, value, status and commission; open orders say Estimated, not recorded.



Payments and adjustments

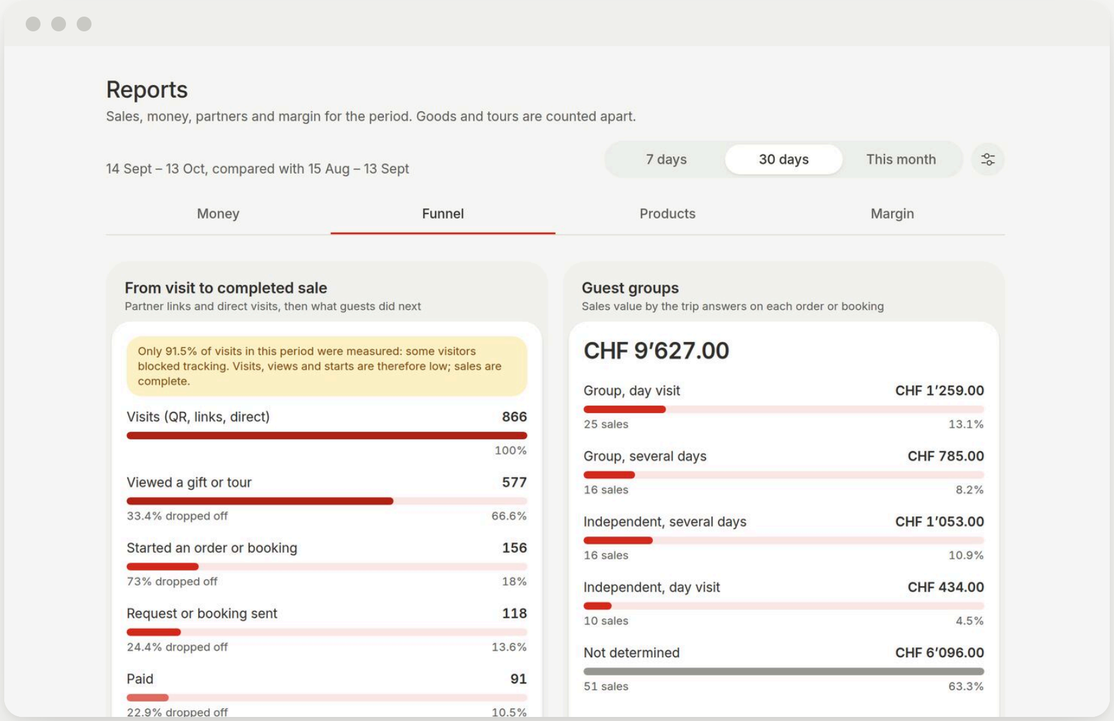


Transactions

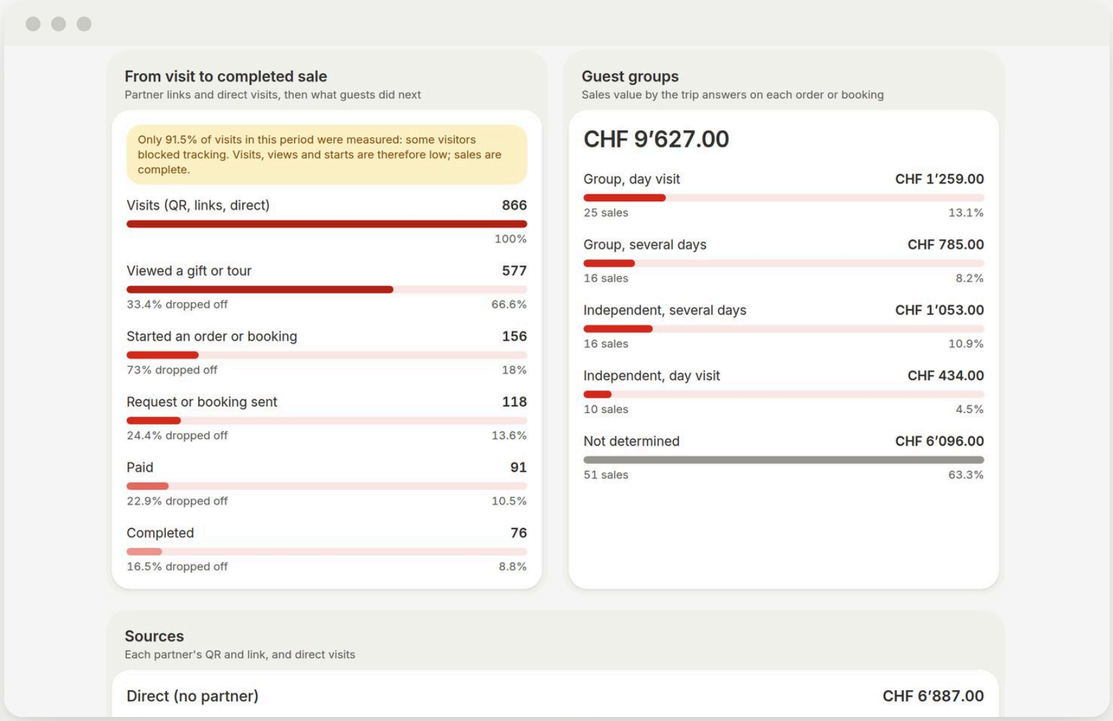
See which channels and guests convert

Reports show how many visitors become buyers, split by partner and by four guest groups, so you can see where marketing time pays off.

- **Filters**
  Narrow any report by period, source, goods or tours, guest group, or a single product or tour.
- **The sales funnel**
  Steps run from link opened to completed, with the share lost at each step.
- **Four guest groups, one 'unknown'**
  Guests we cannot place are counted as not determined; partial tracking shows its coverage instead of a lower count.



Funnel and filters

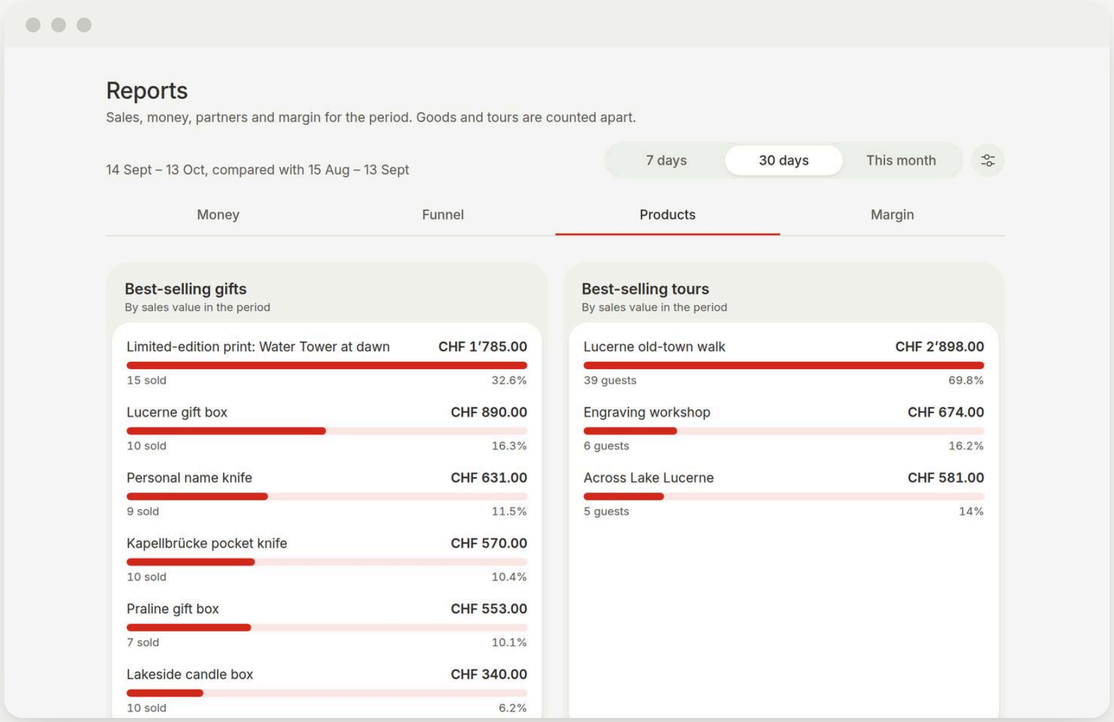


Sources and guest groups

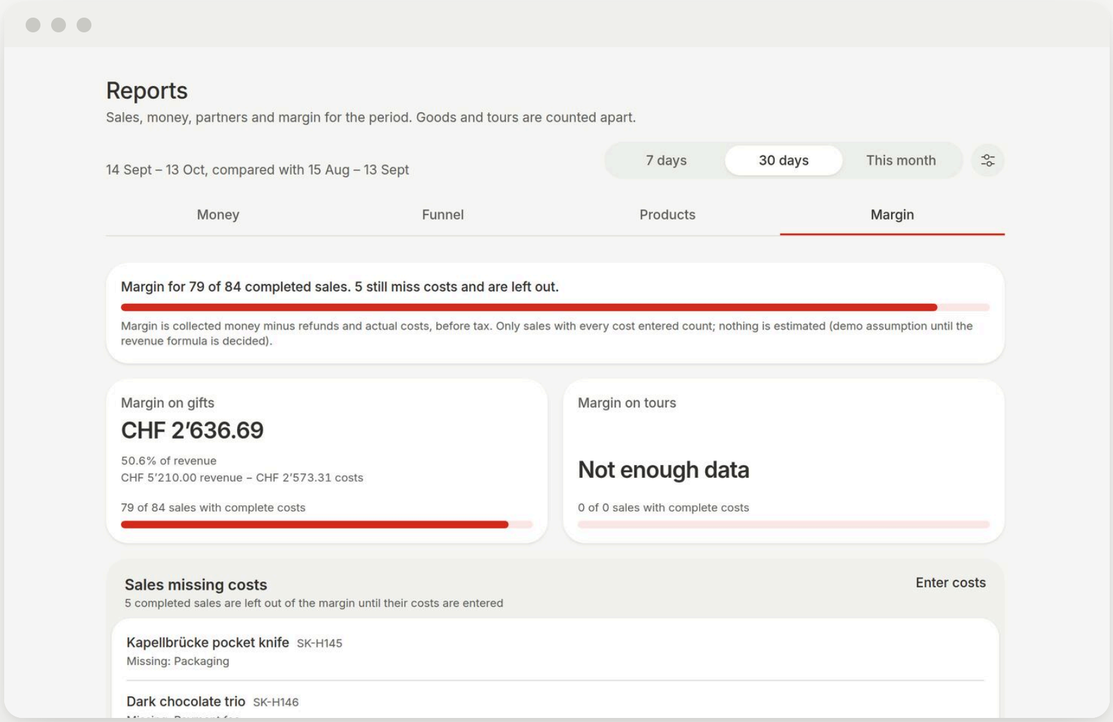
Best sellers, operations and margin

See what sells, how deliveries and tours are going, and what you really earn, counting only sales whose costs are all entered.

- **Best sellers**
  Products, variants and tours ranked, with stock and seat figures beside them.
- **Operations**
  Delivered, no-show and cancelled counts, plus how stories and the advice chat perform.
- **Margin needs known costs**
  Collected money minus refunds and costs; sales with missing costs are listed and left out, never guessed.



Products and operations

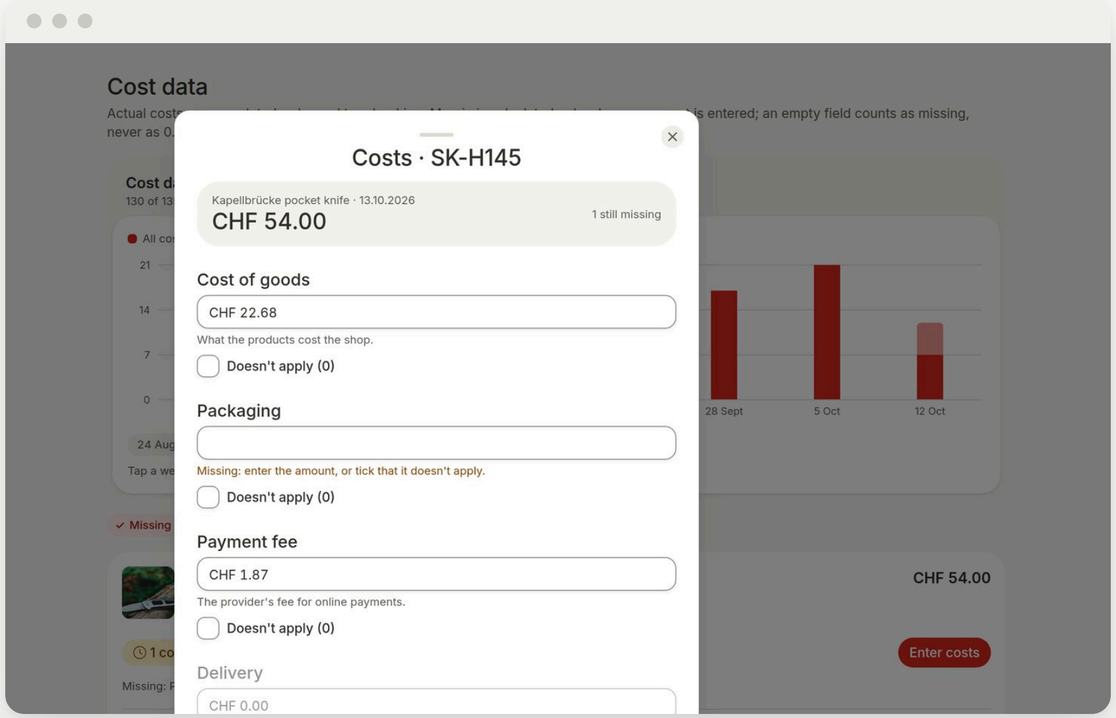


Contribution margin

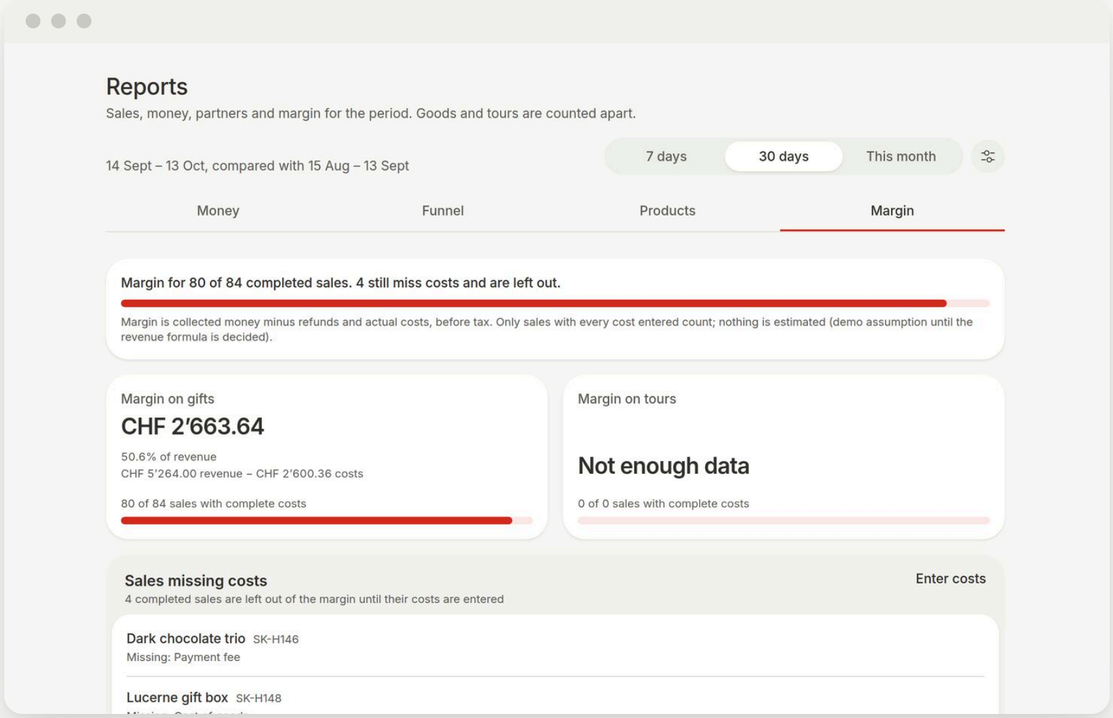
Enter costs to unlock margin

Margin is only shown for sales with every cost entered, so the shop fills in the gaps, and the report updates at once.

- **Five cost types**
  Cost of goods, packaging, payment fee, delivery and other variable costs, per completed order or booking.
- **Empty is missing, not zero**
  An empty field stays flagged; the shop enters an amount or ticks that it doesn't apply (0).
- **Coverage goes up**
  After saving packaging for one sale, margin covers 80 of 84 completed sales instead of 79.



Enter costs



Margin after saving
